NO HOLIDAY LULL IN MARKET Action From Coast To Coast

The Market in Depth

The New Year starts off with a real bang for numismatics. Dealers are scurrying to the FUN show with more on their minds than beating the early winter blues of the Midwest and Northeast. According to all predictions, this show could be one of the hottest in recent memory. The activity of the last two months has provided sufficient optimism and momentum to make FUN "a tough act to follow for the rest of the year." Well, at least until Long Beach or the ANA; there is nothing like a rising market to bring out dealer's enthusiasm. And they will have the opportunity to demonstrate that enthusiasm at Mid-America's 3171 lot auction---a superb way to celebrate another year of buying opportunities.

Both dealers and collectors will have even more to cheer about with the upcoming auctions scheduled for late January. Indeed, if January started with a "bang", then it is ending with an "explosion" of buying opportunities. In fact, this seems almost like a continuation of the Autumn Auction abundance of riches. The NASC Convention in Los Angeles will enjoy five sessions of Bowers and Merena's The Estate of Byron F. Johnson, Jr., with a superb offering of high quality specimens.

Superior Galleries starts off a three-sale marathon on January 29 with the Jack H. Robinson Collection of Half Cents and Large Cents; this sale needs no introduction, with its superlative offerings of quality and variety. With 360 pages devoted to 2021 lots of Early American Coppers, this catalogue became a collector's item before it was printed! What words can we add about a collection that starts with 21 examples of the 1793 Large Cent, with Sheldon varieties 1-16 included. This collection will serve as the ultimate collector's dream for decades to come, with its extensive offerings of rarity and quality, assembled with scholarship and dedication, and featuring pedigrees that read like an encyclopedia of numismatists and great collections. Robinson refers to his "addiction"; it is such "addictions" that made numismatics what it is today.

The 2000+ lots of the Moreira Sale, Part III, contain a selection of material that will provide many needed specimens to those collectors and investors aspiring to assemble world-class collections. The example of the Robinson collection, demonstrating what can be done with patience and a keen eye, will certainly not be lost of those specializing in the other denominations of American numismatica.

Superior's third sale of the trilogy, The Connoisseur's Collection of U.S. Gold Rareties, is bound to make numismatic history: a collection gathered with one strategy in mind---to buy the finest QUALITY gold coins possible. Assembled over several decades by a prominent West-Coast physician, the collection consists of 556 lots of superb specimens, including many that qualify for "the finest known". The collector paid premium prices for such pieces, which at the time doubtless seemed "outrageous";

the wisdom of such an investment strategy will again be made apparent.

The Connoisseur's Collection contains 133 Mint State gold coins graded MS-65 through MS-69, and 55 Proof gold coins graded Proof-64 through Proof-69. Among the Commemorative gold coins, seven are graded PCGS-66 or better; but you could well argue that the strengths of quality and rarity lie with its Gold Dollars and Three Dollars! Approximately half of the collection has been certified by PCGS, and include several of PCGS' highest graded.

January is going to be remembered as one of the hottest on record, with Orlando and Los Angeles leading the numismatic nation in record-setting temperatures. This is one kitchen you won't want to stay out of!

This Week's Market

CENTS thru HALVES: The BU roll market has been lumbering along these past few weeks. The only real positive action seems to be in the Kennedy series. BU Lincoln rolls are seeing little to no action, while Jefferson rolls are finding some discounted offers to sell, thus creating several minus signs. BU Mercury and Roosevelt Dimes are mostly stable with very few changes. BU Washington Quarter rolls suffered only two declines as the 1955-P and 58-P, both fell; they are Bid at \$70 each. BU Franklins are steady at current Bid levels with just a couple of minor changes, while Kennedy rolls have a whole run of plus signs.

DOLLARS: The Dollar market remains very strong in MS-63 and higher, including Prooflike specimens. This area of numismatics is quite deep as most dealers are competitive in an effort to obtain coins for clients or their inventories. A long list of plus signs can be found on pages 4 and 5.

PROOF SETS and MINT SETS: This is typically the time of year that the most common Proof and Mint Sets begin to quietly retreat. However, with the exception of a couple of Proof Sets, this is not yet the case. In fact, there are numerous plus signs in these two charts.

COMMEMORATIVES: Gold and Silver Commemoratives are very strong at current levels with the MS-65 columns revealing a multitude of increases. This is another area which has a rather large following.

TYPE: The Type market continues to push higher as dealers try to fill want lists. This is an area which dealers feel may begin to sizzle at the FUN Show. All grades, MS-63 and higher (Proofs also), are receiving consistent Bidding, some higher. The exception may be the "60" grade, which appears softer.

GOLD: Circulated U.S. Gold continues to drop relative to gold bullion levels. The market appears to be more interested in lower premium gold, such as, Eagles. However, MS-63 and higher quality coins are still in strong demand by collectors and investors. These grades have little to do with premiums over gold content.

EAGLES: American Proof Gold Eagles are trading at: 1986 1 oz-\$456/\$473, 1987 1 oz-\$485/\$515, 1987 1/2 oz-\$237/\$257. Proof Silver Eagles wholesale at: 1986-\$24.50/\$26.50, 1987-\$17/\$19, 1988-\$33.50/\$35. BU 1986 Silver Eagles trade at \$10.50/\$11.20.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Summery, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCDn. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

1921 ALABAMA M.S. 65

Absolutely amazing for an Alabama, breathtaking toning, clean cheeks and no facial lines. There are no 66's in the world, so this could be the best. **\$6000. Firm.**

1921 D MORGAN DOLLAR M.S. 65

We do have a rare 66 21 D listed elsewhere in this ad, but a 65 is still rare and this one is also beautifully toned, with sea-green reddish colors well struck with only one visible mark. **\$2000.**

1934 WALKING LIBERTY HALF M.S. 67

A rarely seen earlier date 67, this coin is lightly toned overall gold. It is exceptionally clean and has wonderful eye appeal. A great type coin. **\$5000. Firm**

1937 ANTIETAM M.S. 66

Incredible blazing lustre shows off the gorgeous sea-green toning of this coin. The color is so intense it almost “glows in the dark” someone told me this might be the world's most expensive flashlight. **\$2000.**

1936 ALBANY 50¢ M.S. 66

I believe this coin is technically undergraded, it has no discernable marks plus the hip is well rounded. A very eye appealing golden overall color. **\$2500**

1885 SEATED LIBERTY HALF PROOF 65

Again a coin I believe is undergraded. It has no marks or visible hairlines. The obverse is a lavender reddish-blue that grows darker toward the edges, the reverse is a medium gold. Less than 10 graded **\$6250.**

1882-S M.S.67 PL THE FINEST KNOWN

There are no 68's of this date, there probably never will be. This coin is absolutely the best 82-S in the world!!!! You don't have to take my word for it, come and see for yourself.

PRICE ON REQUEST!

1927-S QUARTER M.S. 67
(Finest and only known example of this date)
 Every now and then during your lifetime you may have a chance to own the finest known of a coin. This is such a coin. Many people would like to own a “27-S” quarter in any grade. This coin is unbelievable. Reddish-gold with splashes of pastel blue. When you consider rarity and quality together this is the finest coin minted in the 20th century.
PRICE ON REQUEST!

1898 PROOF BARBER 50¢ (NGC 67)

It would take a whole page to describe how much eye appeal this coin has. The colors on both sides defy description. They are intensely **STUNNING!** This is on top of perfect surfaces.

FUN SHOW ENLIGHTENS MARKET Heavy Attendance Spurs Dealer Activity

The Market in Depth

The FUN show began rather tentatively (at best), considering the strength of the overall market through December. The majority of dealers had anticipated a very active FUN show, but through set-up and the first day most dealers were only busy looking to others for leadership. The more aggressive dealers were doing their "thing" and reporting profits, but volume was lower than expected.

Many dealers lowered their Bids on the more common material, while potential sellers were testing the strength of the market by raising their sells; the overall effect on market prices was negligible. Thus, sales were somewhat slower than expected as buyers and sellers, for the most part, failed to get together.

Rarer and higher-grade material (especially Type) began the show at the same slow tempo. Dealers unsuccessfully trying to buy nice Type coins were heard to complain: "There wasn't much nice material at the show.", but walking the bourse one could view a vast array of Gem-quality coins at numerous tables. Potential sellers, on the other hand, appeared to be somewhat afraid of being "picked-off" by other dealers. Volatility of prices and the absence of strong leadership results in markets where Bidders are afraid of overpaying so accordingly Bid low, while sellers are afraid of giving away their coins so accordingly set their Asks high. Market leadership continues to play a major role in pricing and activity levels.

After the opening day jitters, the rest of the show witnessed increased attendance and activity. The FUN show may well have set a record for attendance with over 15,000 passing through the turnstiles. With the crowds came increased dealer activity as inventory needed to be replenished. For the dealers who worked diligently and responded to customer needs, FUN spelled success. The only real drawback may have been the lack of any major investment house orders. Dealers had to rely upon their extensive want lists to generate additional activity; since such want lists contained better material, it only exacerbated the show's slow start.

Mid-America's FUN Auction saw hammer prices of nearly \$3.2 million:

Date	Cataloguer's Description	Price Realized
1796 Bust Dime	Select Unc 64	\$ 38,500
1942/1-D Mercury Dime	Select Unc FB 64	4,950
1846 Seated Lib Quarter	Gem PR-65	11,000
1917 Standing Lib Quarter	Matte PR-65	34,100
1796 Bust Half, Overton-102	EF-45	38,500
1838 Gobrecht Dollar, RE	Choice PR-63	12,650
1889-CC Morgan Dollar	Select Unc 64	17,600
1915-S Pan-Pac \$50 round	Unc 61	38,500
1915-S Double Pan-Pac set	Ch/Gem Unc	176,000
1860 Deseret Assay \$5 Gold	AU-55	11,000

Bowers & Merena's upcoming auction, The Estate of Byron F. Johnson, Jr., reminds us that one of the nicest things about numismatics is that sales between 10¢ and \$100,000 can provide both a learning experience and the joys of collecting. To be held in conjunction with the NASC convention in Los Angeles, in late January, the auction reflects varied interests; there is material here for the investor and collector: colonial coins, choice and gem type coins, some classics (1800 Libekty half dime, a high grade Arrows and Rays quarter, a Stella), Overton halves, Bolender dollars, Morgans, commemoratives, an outstanding group of quarter and early half eagles, and territorials. In short, this is what coin collecting is all about.

This Week's Market

CENTS thru HALVES: The BU roll market still leaves a lot to be desired.

The majority of dealers won't even Bid on BU rolls since it only ties up cash which could be better spent on single coins and customers don't seem to have much interest in rolls. This may be a very important transitional period in which rolls eventually get broken down into singles as the only active market. Still, BU rolls of Franklins and Kennedys are steady at current levels as Bidders try to locate rolls for inventory.

DOLLARS: The Dollar market continues to be one of the most highly sought areas of the coin business. At the FUN Show, Dollars were on virtually every want list. Higher buys continue to be monitored for MS-64 and 65 specimens, while MS-63 and better prooflikes are rising dramatically. The only softness found at the show may have been for the most common dates in MS-64 and 65; also the MS-60 grade appears to be difficult to sell as buyers are looking for quality.

PROOF SETS and MINT SETS: Proof and Mint Sets appear to be steady at current Bids, however, the lack of plus signs seems to be of some concern to marketmakers. Fresh orders are needed to spur this market.

COMMEMORATIVES: Plus signs may not be in evidence, but this was a very active series at FUN. Transactions were not limited to high quality coins as all grades were trading.

TYPE: The Type market leads the strength of this current market. Almost every dealer is looking for better dates and/or less-than common quality. Furthermore, many dealers are willing to buy even common issues proportionally priced in relation to the actual grade.

GOLD: Circulated U.S. Gold is losing its premium as marketmakers continue to lower their buy prices. This area was very weak at the FUN Show. Now, for the good news! MS-63 (except for twenties) and better Gold remains on most want lists with several issues wanted at higher Bids. Potential sellers usually demand over Bids, especially if they have somewhat better dates.

EAGLES: American Proof Gold Eagles are trading at: 1986 1 oz-\$450/\$460, 1987 1 oz-\$480/\$510, 1987 1/2 oz-\$235/\$250. Proof Silver Eagles wholesale at: 1986-\$24.75/\$26, 1987-\$17.50/\$18.50, 1988-\$33.50/\$35. BU 1986 Silver Eagles trade at \$10.70/\$11.20.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions
are used throughout the CON to designate the exact quality of Brilliant Uncircu-
lated coins.MS-60 - Unc. may not have full mint lustre, may be dull, toned, or spotted. May
be the worst possible example, but shows no wear or damage.MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not
be so dark as to hide any problems), will have minor bagmarks and may show
weakness of strike. Above average coins.MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65.
Few contact marks in field, only minor marks on main devices. Full strike, with
eye-appeal. Attractive toning permissible.MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main
devices. Attractive toning permissible. A very tiny percentage of available BU
coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

WE GRADE BY THE COIN, NOT THE CLOCK.

We know that an accurate grade takes time. So we spend more time on each coin to grade it accurately, instead of speeding through thousands of coins a day to beat the clock.

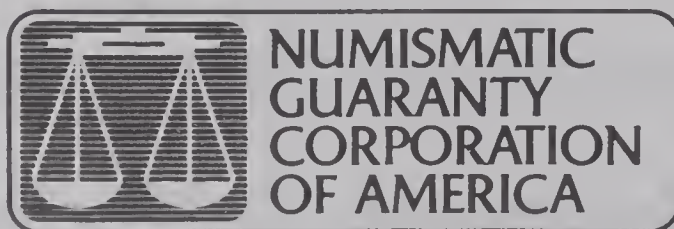

We offer limited, accurate grading.

Numismatic Guaranty Corporation knows how important it is for your coins' grades to be accurate. So we make sure our graders have plenty of time to grade your coins accurately. Our graders are limited in the number of coins they can appraise each day, and we accept only a limited number of coins for grading. We're the *only* coin grading service that sets these limits.

We've set the industry standard.

The grade we assign your coin today will still be valid *ten years from now*, because NGC-graded coins are not subject to fluctuating grading standards. We know that our greater investment in grading time produces a better investment for you: a coin with a stable grade.

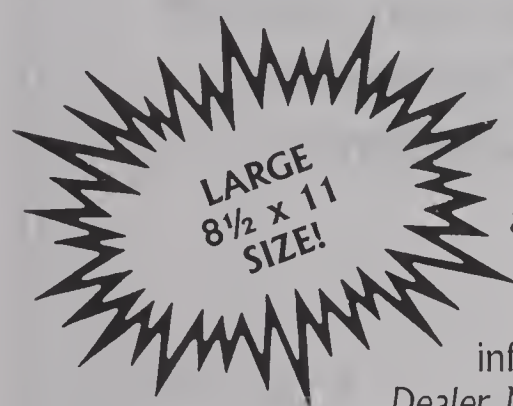

For stability, reliability and accuracy, look for NGC certified coins at dealers displaying the Numismatic Guaranty Corporation of America sign.

For the NGC dealer nearest you, contact: Numismatic Guaranty Corporation,

MARKET STEADY IN SLOWER TRADING Type Market Most Active Area

The Market in Depth

With one major exception, it is generally conceded to be common “numismatic” knowledge that certified (slabbed) coins form a more readily traded market than their uncertified (raw) counterparts. The exception, of course, are the major auctions where a large audience is willing to compete for fresh material. However, for the purposes of a “quick sale”, slabbed coins have an advantage due to the sight-unseen Bids maintained by dealers.

In many cases, a dealer’s sight-unseen Bids will be very conservative, as he will not want to add ‘unknown’ items to his inventory at top dollar. This rationale also manifests itself in many dealers (buyers and sellers) listing separate prices for both sight-seen and sight-unseen. So what does the sight-unseen market represent? At the core of the sight-unseen market is the basic philosophy of instant liquidity. By no means does the sight-unseen Bid represent the ultimate value of a coin or what a knowledgeable dealer might pay for a coin sight-seen.

It can be argued that the basic philosophy behind coin collecting is one buyer liking a coin better than another buyer, and consequently willing to pay a higher price for it. This, in fact, represents the high-buyer or Bid, and can be considered the market expression of full value. Since the basic philosophy behind coin investing is liquidity (and the concurrent ability to quickly move in and out of the market), this must occur at the expense of full value--especially for the more commonly traded material (‘generic’ coins)..

This brings us to the current market. Going into the FUN show, the market was considered relatively strong. Yet, before leaving for Florida, many slab dealers either lowered their sight-unseen bids or removed them from everyday trading on the teletype systems; these actions generally lowered sight-unseen Bids by about 20%. FUN was considered a success by most dealers, yet sight-unseen Bids remain lower than before the show!

Does this mean that the market is down? And what does this have to do with Value? What about the high sight-seen Bidders? If the sight-unseen market creates a new lower base every time marketmakers go to a major show, must it necessarily follow that the market is down and that the sight-seen market must follow? If that is the case, then buyers might do well to wait until after major shows to buy at lower levels, then sell while the market is climbing before the next major show. This certainly gives new meaning to market timing.

This Week's Market

CENTS: A few early issues of BU Lincoln rolls have become available at

lower levels. The 1935-D, 38-S, and 39-S have fallen as a result. The 1970-S sm date roll is stronger at \$660 Bid.

NICKELS: BU Buffalo and Jefferson Nickel rolls appear steady at today’s levels. The only noticeable change is to the 1951-S Jefferson roll, now Bid at a higher \$37 per BU roll.

DIMES: BU Mercury Dime rolls continue to find some weakness from 1940 to 45. This week the 1943-S is down to \$825 Bid and the 1944-P roll is lower at \$550. A few Roosevelt rolls are also suffering from ease of acquisition. The 1946-D (\$75), 49-P (\$590), and 55-D rolls all found lower sells recently. One positive note is the 1946-S roll is now up to \$128 Bid after falling to nearly \$100 in early 1988.

QUARTERS: Weakness can also be found in the BU Washington Quarter chart. The 1937-D roll has now fallen to \$1375 Bid; that’s down from \$1650 in August. In addition, the 1950-S and 54-S are lower at \$275 Bid and \$80, respectively. The 1955-D seems to be somewhat elusive as Bid rises to \$92. Those dealers with rolls in inventory seem to be holding out for higher Bids as in the past.

HALVES: Although very active at Bid levels over the last few months, BU Franklin rolls are beginning to find some discounted issues which do not find Bid buyers. This has caused the following rolls to move lower: 1954-P, 58-P & D, 60-D, 62-P, and 63-P & D. The 1957-P roll is higher, however, as is the 1959-D. Kennedy rolls remain active at current Bids, with a few plus signs scattered along the chart.

DOLLARS: The Dollar charts indicate very few changes in the MS-64 and lower grades. Yet, in MS-65 there are still numerous pluses throughout. This is not only an indication of the strength of this series (in MS-65 and higher), but the number of potential buyers also indicates depth.

PROOF SETS and MINT SETS: The Proof Set chart is mixed as dealers adjust their buys according to inventories. Mint Sets remain active at current levels with a few plus signs within the chart.

COMMEMORATIVES: The Commemorative market, although still active, is experiencing a small number of adjustments of specific issues. The issues which have fallen are seeing lower Bidding activity with some lower offers to sell.

TYPE: The Type market is literally covered with plus and minus signs. The majority of the plus signs occur for nickel and silver coins, while copper issues reveal numerous minuses.

GOLD: The U.S. Gold market continues to flounder in circulated grades. This seems to be having some carryover effect on some Mint State issues (mostly MS-60), although high grade specimens remain strong.

EAGLES: American Proof Gold Eagles are currently trading at: 1986 1 oz - \$450/\$463, 1987 1 oz - \$480/\$510, 1987 1/2 oz. - \$225/\$255. Proof Silver Eagles wholesale at: 1986 - \$24.50/\$27.50, 1987 - \$16.50/\$18, 1988 - \$33.50/\$35.50. BU 1986 Silver Eagles are trading at \$10.50/\$11.15.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 Unc - may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

LONG BEACH AND AUCTIONS—TEST MARKET Common Coins Drift Lower

The Market in Depth

The auction market continues to provide collectors with an abundance of rare and highly desirable specimens. At Stack's \$3.6 million Auction of U.S. coins last week, bidders responded enthusiastically: a 1792 Half Disme in AU condition brought \$20,900; a Brilliant Proof 1867 Nickel with Rays realized \$6,325; an 1876-CC Twenty cent in mishandled VF realized \$19,800; an 1842 Small Date Proof Quarter brought \$22,000; a Brilliant Proof 1854 Arrows Half Dollar reached \$13,200; and an 1867 11 piece Proof Set, \$27,500.

Stack's specialty sale of the L.R. French Family Collection of Dollars received the attention expected. The 1794 Bolender-1 \$1 in BU realized \$154,000; a 1795 B-2 in Choice BU brought \$44,000; an incredible trio of early proofs, 1801, 1802 & 1803 yielded \$82,500, \$77,000 & \$85,250 respectively. The French 1804 \$1 in EF cost the high bidder \$242,000; an 1884 Trade Dollar in Brilliant Proof realized \$72,600, and its companion 1885 brought \$104,500.

February ends with some spectacular sales in Southern California. Bowers & Merena's auction of the Estate of Byron F. Johnson accompanies the Numismatic Association of Southern California convention. Starting the following day will be a trio of non-stop auctions by Superior Galleries: The Jack H. Robinson Collection of Large Cents and Half Cents (2000+ lots); The Moreira Collection Sale, Part 3 (with its highlight 1879 "Quintuple Gold Stella"); and the marathon ending with A Connoisseur's Collection of United States Gold Rarities (on Tuesday, January 31). Dealers and collectors alike will take a deep breath and immediately launch into the Long Beach Coin Show, with a certified-only auction by Pacific Coast Auctions on Wednesday, and Heritage's sessions Thursday through Saturday.

Dealers are reticent about predicting market direction after the "mis-directed" FUN show. Without apparent leadership, the market very tentatively sought direction---growing activity saw common "generic" coins dropping slightly with better material rising. Dealers' primary concern seems to be the ability of the market to absorb the flood of spectacular material (mostly from so many auctions). Coin prices are supposed to fluctuate in this free market according to supply and demand. Over the next two weeks, there will be no question about the adequacy of supply; will the demand and fresh supply of money appear to prevent prices from sliding? Collectors and investors alike are now confronted with a great opportunity to enhance their holdings.

Dealers who have experienced market cycles have seen times of abundant material, but few can recall such a sustained appearance of coins of both rarity and high quality. While auctions have long been a favored means of dispersing great collections, who can question that something very special started last summer? An "up" market is usually the best time

to take a "small but tidy" profit, but the market must respond to the challenge.

This Week's Market

CENTS: BU Lincoln rolls continue to find issues which are soft. Many more deals have been coming into the marketplace which contain discounted rolls. This week finds the following rolls at lower Bids: 1938-S, 44-S, 46-P and S. The only bright spot is the 1970-S sm date roll, now Bid at a higher \$675.

NICKELS: BU Buffalo and Jefferson Nickel rolls have been relatively quiet this past week. The only Buffalo rolls monitored this week seemed to change hands quickly. One positive note is the 1951-S Jefferson, now Bid at \$40.

DIMES: BU Mercury Dime rolls (the common issues) are still being discounted. Some issues go unsold at previous Bid levels, thus causing a drop in the market. Roosevelt Dimes are unsteady, yet, only one issue fell this week. The 1952-D is down to \$65 Bid.

QUARTERS: BU Washington Quarter rolls are showing some life as the 1946-S (Bid \$155) and 1947-S (Bid \$175) are higher this week. However, a few other issues are soft; the 1942-S, 46-D, and 48-S are lower.

HALVES: For the most part, BU rolls of half dollars are steady at today's levels. The only Franklin rolls lower are the 1963-P & D issues. Walkers are unchanged and Kennedys appear relatively solid.

DOLLARS: Numerous adjustments can be found in the Dollar columns for VG thru AU coins. However, most of the changes in MS-63 are to the upside. MS-64 and 65 Dollars also find numerous changes as dealers adjust their Bid levels. The Prooflike columns (63 & 65) contain a long list of plus signs.

PROOF SETS and MINT SETS: A few of the common silver Proof Sets are lower (1959-63), but the rest of the market appears firm. Mint Sets remain active at current levels with several advances.

COMMEMORATIVES: A massive amount of changes can be seen in the Commem columns. The majority of changes are to the downside as dealers lower Bids due to inventory considerations. They may not have an overabundance of Commems on hand, but heavy inventories create cash-flow imbalance and a need to drop buy prices in many areas.

TYPE: The Type market appears to have two sides to it. Copper and nickel coins are showing weakness resulting in lower Bids, while silver coins are strong showing numerous plus signs.

GOLD: The U.S. Gold market looks a little stronger this week, even the circulated issues. This is due to higher bullion levels. Nonetheless, a few of the marketmakers feel circ gold is not yet ready to move too much higher.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$453/\$465, 1987 1 oz-\$480/\$505, 1987 1/2 oz-\$230/\$245. Proof Silver Eagles are trading at: 1986-\$24.50/\$27, 1987-\$17/\$18.50, 1988-\$34.50/\$36. The BU 1986 Silver Eagles are trading at \$10.50/\$11.20.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for edjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Thinking of selling?

Let Bowers and Merena get the best prices for you!

Right now we are accepting consignments for our upcoming auction season, with sales to be held in **New York City**. Plus, we are accepting consignments for the **1989 ANA Convention Sale**. We offer you the following:

Experience: Of the top 10 world's coin records, we hold nine, including all seven of the top seven! We also hold the record for selling the three most valuable coin collections ever auctioned: (1) The \$25 million Garrett Collection for The Johns Hopkins University, (2) The \$20 million Norweb Collection, and (3) The \$12.4 million Eliasberg Collection of U.S. Gold Coins. Over a span of many years we have sold approximately \$200 million worth of coins for more than 5,000 consignors. Whether your collection is worth \$2,000 (our minimum due to bookkeeping considerations) or \$25 million, you've come to the right place!

■ This 1861 Paquet reverse \$20 brought \$660,000 in our Norweb sale.

Expertise: Your coins and paper money will be catalogued by such well-known numismatic experts as Q. David Bowers, Dr. Richard Bagge, Michael Hodder, Ray-

mond Merena, Andrew W. Pollock, Elizabeth Arlin, and Tom Becker, backed up by full in-house facilities, including our Photography Department, our Graphics Department, and others. The result is a beautiful and authoritative catalogue which will highlight your numismatic material to its best advantage. Did you know that our catalogues have won more "Catalogue of the Year Award" honors (given by the Numismatic Literary Guild) than have ALL of our competitors combined? There must be a reason!

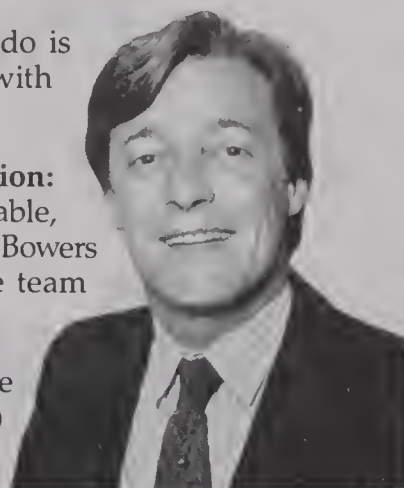

Reasonable Rates: For one low commission rate to you, the seller, plus a fee charged to the buyer, we handle EVERYTHING—from complete insurance starting the moment we acquire your coins, to cataloguing, to photography (of important pieces in full color), to advertising and publicity—in other

words, all you have to do is figure out what to do with our generous check!

Pleasurable Transaction: We offer you a pleasurable, enjoyable transaction. At Bowers and Merena, the entire team is on your side!

The first Step: Please contact Richard ("Rick") Bagge, Ph.D., or Ray Merena today—by COLLECT telephone call or use the coupon below. Have a question?

We have the answers. Or, if you prefer, direct your inquiry to Q. David Bowers or Michael Hodder. We will take it from there. This may well be the most important financial move you've ever made!

COPPER COLLECTORS PIG-OUT

Type Coins Continue Strong Advance

The Market in Depth

Auctions, Auctions, Auctions, . . . There are so many this week that we couldn't possibly report on them all. From Bowers and Merena's Annual Los Angeles Sale to Superior's "trio of sales". The Bowers and Merena Sale (Estate of Byron F. Johnson) was met with enthusiasm as prices realized topped \$3.8 million.

As of this writing only one of Superior's Sales had been completed. But what sales!!! The Moreira Collection Sale (after only two sessions) had realized over \$2.5 million. The highlight of this sale was the 1879 Quintuple Gold Stella, which brought an intense \$170,500. However, a much larger story may have been the Jack H. Robinson Collection of Large Cents and Half Cents. The auction room contained a standing room only crowd of enthusiastic copper collectors. Yes, collectors who must have felt like they had "died and gone to heaven". One such collector wore a shirt that said "Penny Pig-Out 1989". On the front it said, "Thanks Jack". Of course, this isn't the first time these avid collectors have identified their hobby.

There was so much excitement in the room it made one realize that yes, the collector market is alive and well. Jack Robinson sat in the front row with his lovely wife at his side. At various times, he was moved to go and shake hands with some winning bidders after some key lots were hammered down. But, then again, "key lots" made up almost the entire sale. Here, the total prices realized (although quite important to Mr. Robinson) may not be as important as the fact that Early American Coppers collectors were out in force; and no one can deny the strength of the collector market when they want what they want. Total price realized was in excess of \$1.6 million.

One of the main drawbacks that the certified coin market has created is a volatility never before experienced in the rare coin business. Sure, we have experienced dramatic ups and downs (1979-80 and 1982, respectively), even gold and silver bullion whips back and forth. But, how can rare coins swing as violently as the certified market sometimes indicates?

The key expression here is "rare coins". Rare coins will move in cycles according to supply and demand which is usually related to the amount of profits or losses experienced. However, "rare coins" do not fluctuate as dramatically as inconsistent certified bidding would have you believe. It is more a matter of marketmakers moving in and out of the market. Thus, certified Bids may be \$2000 one week, \$3000 the next week, \$4000 the following week, then fall back to \$2500 the very next week. Does this mean that an owner of this particular issue lost \$1500 in value in just one week? Probably not. It is most likely that the active marketmakers withdrew their Bids resulting in the appearance of major weakness.

This scenario recently occurred during and after the FUN Show with many issues appearing weak when, in fact, there were very few sales taking

place at the lower Bid levels, especially for low-mintage (or low availability) coins. Yes, the more common coins did weaken and still may fall further, but these are not "rare coins".

This Week's Market

CENTS: BU Lincoln rolls had a very quiet week as Bids remain status quo. There seems to be more activity in circulated wheat bags at \$85-\$90 per.

NICKELS: BU Buffalo rolls are steady at current levels, while many BU Jefferson rolls are active at higher Bids. The 1946-D is up to \$16, the 48-S to \$12, the 49-S to \$52, the 50-P to \$42, and the 51-S to \$43. Several of these dates are wanted in large quantities.

DIMES: Common BU Mercury Dime rolls continue soft with the 1937-P and the 44-P down this week. They are now Bid at \$900 and \$525, respectively. This week finds the Roosevelt series steady at current Bid levels.

QUARTERS: It seems like almost every week finds any number of different Washington Quarter rolls moving lower. This week the 1945-S and 1953-P are down to \$200 and \$100, respectively.

HALVES: The majority of Half Dollar rolls are stable at today's Bid levels. The Kennedy series finds a few issues moving to higher levels.

DOLLARS: Common BU Dollars may not be very active, but several issues which are not readily available seem to be on many want lists. This week finds numerous dates moving to higher Bid levels as maketmakers try to locate and buy MS-63, 64, and 65 specimens.

PROOF SETS and MINT SETS: The majority of Proof Sets are steady at current levels with a handful moving higher. Mint Sets continue strong with many plus signs recorded. The 1965 sms is now up to \$9.25 Bid.

COMMEMORATIVES: After last week's temporary setback for the Commemorative series, there are once again numerous plus signs in the MS-64 and 65 columns, both Gold and Silver. MS-65 Gold Commems are very strong as almost every issue has moved higher.

TYPE: Up-to-the-minute reports, including auctions, indicate the Type market is as strong as it has been in a long time. It may be true that many dealers are looking for better-dates, but there are just as many who are willing to accept whatever is available if it is priced according to its actual grade.

GOLD: Once again U.S. Gold is drawing a battle-line. MS-60 and lower quality is slipping as many marketmakers are losing confidence in the more common material. However, MS-63 and better specimens continue to bring higher Bids with many areas receiving even stronger prices at auctions. The truly rare material will bring top dollar.

EAGLES: American Proof Gold Eagles are wholesaling at: 1986 1 oz-\$448/\$462, 1987 1 oz-\$490/\$510, 1987 1/2 oz-\$235/\$250. Proof Silver Eagles are trading at: 1986-\$24.50/\$27, 1987-\$17/\$18.50, 1988-\$34.50/\$36.50. The BU 1986 Silver Eagles wholesale at \$10.75/\$11.20.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. - may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

LONG BEACH SETS THE STANDARD Auctions Realize \$17.4 Million

The Market in Depth

Ahhh . . . Long Beach! It brings out the best in the coin market and the worst in the bullion market. And most importantly, it brings out thousands of numismatists---Dealers, Collectors, and Investors. Anyone who believes that such a successful show just happens because of the success of previous shows seriously underestimates just how much attention is lavished on this tri-annual event. This Long Beach was no different. Well, maybe a little different. Excitement was generated by several noteworthy events. An 1880-S Morgan Dollar roll traded hands at least four times on the bourse floor, touching \$20,000 and ending at \$27,000. The Norweb 1893-S Morgan Dollar was certified by PCGS as an MS-67, with some of the graders in favor of a higher rating. And in terms of impact on the coin industry, the premier social event of the numismatic year was the colossal dinner party given by Iraj Sayah.

On second thought, maybe this Long Beach was different from what most dealers expected. Far from the high expectations dealers had for the FUN Show one short month ago, the majority of dealers just came to Long Beach to do business! And that they did. From the smallest dealers to the major marketmakers, they turned merchandise; from common coins to rarities. Customers (of every persuasion) still want to see the merchandise; and you can't see the coins if they aren't in stock. (In fact, we were rebuked by two dealers at the show for using the terms such as "merchandise"; we were reminded that their customers want to see coins, not "specimens" or "product".) But it does the dealer no good if the coins sit in stock because he is uncertain about the price to charge (as happened at FUN); then he becomes a 'non-profit' museum. Turning inventory is the name of the game, and Long Beach saw plenty of that.

More than a thousand dealers and guests crowded Iraj Sayah's dinner party, and they were treated to more than wonderful food and spectacular entertainment. (For those dealers who have trouble deciding upon their favorite international cuisine, the dinner provided a sumptuous solution: it was simply all there.) The coin business, they were gently reminded, needs to put forth a more professional and elegant image to compete in the larger financial markets. Such advice is always more significant when it comes from someone who has enjoyed success both in and out of the coin business. We are tempted to say that it wouldn't be possible to produce a more splendid extravaganza, but we now know better than to underestimate Iraj's plan for the Second Annual International Numismatic Friendship Party.

And the recent ten day numismatic extravaganza in Southern California wouldn't be complete without an auction summary:

Bowers & Merena's Byron F. Johnson:	\$3,870,208
Superior Galleries' Jack Robinson:	\$1,628,447

Superior Galleries' Moreira Pt 3:	\$3,632,999
Superior Galleries' Connoisseur's Collection:	\$4,770,684
Pacific Coast's Certsale V:	\$ 623,074
Heritage's Long Beach Sale:	\$2,884,679
Total auction proceeds:	\$17,410,091

This Week's Market

CENTS: BU Rolls of Lincoln Cents have been fairly steady this week with just a couple of changes recorded. The 1970-S sm date roll is up to \$690 Bid, while the 1947-D is down to \$6.50 Bid.

NICKELS: Common BU Buffalo Nickel rolls may be a little soft as the 1937-S and 1938-D both fell this week. The Jefferson series found only two changes: the 1948-S, up to \$16 Bid and the 1949-S, down to \$50 Bid.

DIMES: BU Mercury Dime rolls are unchanged, however, the Roosevelt series has several minuses. The 1954-S, 1955-P, D, & S rolls are all lower due to discounted sells.

QUARTERS: BU Washington rolls appear steady for the early issues (1934 thru 1949); nonetheless, there are a couple of changes in the 1950's. The 1954-S declined to \$75, as did the 1958-P to \$65. It appears that rolls dated 1950-64 must be discounted in order to entice would-be buyers.

HALVES: BU rolls of Half Dollars appear to be steady at current Bid levels. Walkers, Franklins, and Kennedys are all unchanged this week.

DOLLARS: The Dollar market continues to be one of the most active areas of numismatics. MS-63 and 64 Dollars have long lists of pluses and minuses depending on the needs of dealers. The MS-65 column sports numerous plus signs as dealers attempt to fill want lists for their customers. MS-65 Prooflikes are also hot as can be seen by all the plus signs.

PROOF SETS and MINT SETS: The 'S'-less Proof Sets are still in strong demand. The Prestige Sets appear a little weaker due to lower sell prices. Mint Sets remain quite strong with several moving higher.

COMMEMORATIVES: The Silver Commem market continues to strengthen as evidenced by the plus signs in the MS-65 column. MS-63 and 64's are steady at current levels. Gold Commems remain difficult to locate in most grades.

TYPE: The Type market is the most active series for the majority of dealers. This area takes into consideration every series which satisfies the desires of most dealers. There seems to be just enough coins available to insure an actively traded market.

GOLD: MS-63 and better U.S. Gold remains sought at current Bid levels. However, the VF thru MS-60 market is considerably weaker and is causing some concern among dealers. There is a lessening demand for circulated Gold as the educated public is demanding quality.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$443/\$458, 1987 1 oz-\$480/\$505, 1987 1/2 oz-\$235/\$250. Proof Silver Eagles are trading at: 1986-\$26.50/\$27, 1987-\$17.25/\$18.75, 1988-\$37/\$38.50.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjective grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

P/L DOLLARS AND TYPE LEAD MARKET

BU Silver Rolls Weaken

The Market in Depth

Over the past several weeks we have seen Bid ranges for Prooflike Morgan Dollars move considerably higher. This is primarily due to numerous marketmakers actively seeking Deep Mirror Prooflike PCGS and NGC coins. (The CDN Bids have always represented Deep Mirror Prooflikes). However, any knowledgeable dealer who is confident of his grading skills, will buy "raw" (uncertified) coins at his Bid levels if the coin makes the grade. In addition, Prooflike Dollars are generally an area where buyers want to see the coin before making a decision. This comes from the fact that there are various degrees of reflectivity and values can drop quickly if a coin is only semi-P/L rather than full Deep Mirror on both sides. Granted, this may be asking a lot of a coin, but some of the extraordinary Bids make conservative grading an absolute must!

When grading or buying Prooflike Dollars, it is important for a dealer to grade them as if they were going into his/her own collection. That way, the client will get the benefit of an accurately graded coin which the dealer will be proud to buy back at a future date. The client should also be attuned to the fact that Prooflikes should be graded in the same manner as non-P/L's. That is, according to strike, lustre, number and degree of bagmarks and (in the case of prooflikes) the intensity of reflectivity. Most importantly, the client must be aware that bagmarks will be much more obvious, that is, stand out more readily, on a Deep Mirror Prooflike Dollar.

As with any series, educating your client is of utmost importance so that he may become more comfortable with grading. He must understand the little differences that can cause a coin to be graded one point higher or lower on the grading continuum. Grading is the hardest aspect of numismatics to understand. It is easy for the client to see the price differences from one grade to another, and sometimes the higher grade can be as much as 10 times the next lower grade; however, grades may be similar, yet, one little mark can spell the difference in thousands of dollars. As beneficial as it is for the client to become knowledgeable, it is, perhaps, more beneficial to the dealer that his customers understand grading and pricing. For, in the long run, all numismatists should understand the influences of market cycles (prices do go up and down), but it is awfully difficult to explain how a coin changed its grade by simply resting in a safe deposit box.

The general feeling among dealers is that the overall market is active and strong for the less accessible material. Which means, the more common coins which may be found in many dealer inventories may be on the slow side. This does not necessarily mean that some of the common coins may not be a good buy at current levels, as many of these common areas have fallen in recent weeks to new lows. One problem that dealers encounter occurs when gold and silver bullion softens considerably. It causes clients

to take a wait-and-see attitude, especially so toward the more common coins. However, the more knowledgeable clients who usually buy better material, will also buy into more common areas when buying opportunities are present. That usually occurs when the majority of buyers are waiting on the sidelines.

This Week's Market

CENTS: The 1970-S sm date roll is up again this week, now Bid at \$700. Otherwise, the rest of the Lincoln series remains unchanged.

NICKELS: BU rolls of Buffalo Nickels are still showing signs of weakness. The 1937-S is down to \$850 Bid, while the 1938-D fell to \$700. BU rolls of Jefferson Nickels are showing new strength as several issues have moved higher. The following rolls have plus signs this week: 1940-P, S, 1948-S, and 1951-S.

DIMES: A whole slew of minus signs can be found in the BU Roosevelt Dimes column. Not many dealers are willing to support this market; and there seems to be more sellers everyday. Even the key date 1949-S is a hard sell. It has dropped to \$1200 Bid.

QUARTERS: BU Washington Quarter rolls are faring just as poorly. Several dates are lower due to discounted offers to sell. In this series it is mostly the common issues which are weak.

HALVES: BU Walker rolls seem to be steady at today's levels, probably because potential sellers are breaking them up for singles. Nonetheless, late-date Franklin rolls are showing some weakness. From 1957 to 1962, various issues are lower this week. Kennedy rolls will still command current Bid levels.

DOLLARS: Many adjustments can still be found in the MS-63 column for Dollars. Mostly it's the rare dates that are moving higher, while the little-better-than-common issues are falling off slightly. The MS-64 common issues have fallen to \$100 Bid, with just a few dates higher. The majority of changes in the MS-65 column are to the upside as most high grade specimens, especially non-common issues, prove elusive.

PROOF SETS and MINT SETS: The only changes this week are plus signs for several Proof Sets. Mint Sets, too, are hanging in there as many issues are higher.

COMMEMORATIVES: Although plus signs are not scattered throughout the Commem columns, this series is quite active at current levels. The plus signs which are present seem to be for issues that dealers need for specific orders.

TYPE: Most dealers feel the Type market is keeping the coin business in a minor bull cycle. They have want lists for any number of Type coins and even the common dates are not easy to claim. The 65 columns have the most number of plus signs; however, if they can't find 65's, some clients are willing to accept the next grade available.

GOLD: VF thru MS-60 U.S. Gold continues to retreat to lower ground. It appears awfully weak, but this could be a brand new buying opportunity.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$445/\$455, 1987 1 oz-\$480/\$500, 1987 1/2 oz-\$230/\$245. Proof Silver Eagles trade at: 1986-\$26.50/\$27.75, 1987-\$17.25/\$18, 1988-\$40/\$41.50.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids. THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or tone.

MS-63 Choice BU Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor blemishes and may show weakness of strike. Above average coins.

MS-64 Distinct BU Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 Gem BU Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

A SELECTION OF NUMISMATIC RARITIES FROM THE VAULTS OF MTB BANKING CORPORATION

1866 U.S. TWENTY DOLLAR GOLD PROOF

This aesthetically attractive specimen is one of only 10 or 11 surviving coins from the original mintage of 30 pieces. This highly sought after issue is the first year of the Type II variety with "In God We Trust" added on the reverse. A fabulous specimen of museum quality and rarity. **Borderline Gem Proof 64.** \$45,000.

1881 U.S. TWENTY DOLLAR GOLD PROOF

One of approximately 15-18 known specimens of the original mintage of only 61 coins. This date has always been acknowledged as a true rarity, being the first of the low mintage Philadelphia Mint coinage. The coin offered here is certainly amongst the finest of extant specimens. **Borderline Gem Proof 64.** \$49,500.

1821 U.S. QUARTER EAGLE GOLD PROOF

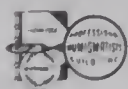

One of only five known examples of this classic early rarity. Proof specimens of this era are seldom encountered, as is the opportunity to purchase one. This is the first year of issue of Quarter Eagles after a thirteen year hiatus in their production. The Garrett specimen, which was of finer quality (sold as lot 743 in March of 1980), realized \$120,000. **Proof 61.** \$33,500.

1885 U.S. QUARTER EAGLE GOLD PROOF

A magnificent example of one of the lowest mintage of all Liberty Quarter Eagles. Approximately 30 known specimens still survive of the original 87 coins minted. One of the most coveted dates in the Quarter Eagle series. Our present offering is a definite condition census specimen. **Cameo Borderline Superb Proof 64.** \$21,000.

MEMBERS OF THE MAJOR NUMISMATIC ORGANIZATIONS

When it comes to rare coin investments . . .

Anyone can tell you what they'll do for you in the Future.
First, though, I'd like to tell you what I've Already done!

Rare coins have been the number one investment performer for as long as I've been involved in coins — for a quarter of a century.

In that time, many rare coin dealers have come and gone; many bull and bear markets have come and gone.

In that time, my business has grown and my customers have prospered.

Why? I'll let them tell you.

- "I trust William Spears' integrity and ability to find me the best value for my money. I have doubled my money in the short time I've been investing with him."

— A Western Washington businesswoman

- "Bill got us interested in investment quality silver dollars three years ago. The bottom line has been a 300% increase in the value of our coins."

— Pacific Northwest convenience stores owners

- "It has always been a satisfying experience doing business with Bill. He has always come through whether it was the acquisition or liquidation of investment grade coins. Quality coins plus a quality dealer equals Bill Spears."

— Northern California coin collector / Investor

- "Since Bill has been handling my numismatic investments, he has continuously improved my portfolio holdings with the finest quality available. He has provided the utmost in service and dependability and has proven to be a trustworthy and knowledgeable rare coin investment specialist."

— A prominent Puget Sound Area Surgeon

The success of my customers has come from an investment philosophy I have followed for many years:

Buy the Best!

I have specialized in **top-grade** silver dollars, Walking Liberty half dollars, commemorative coins, and rare gold — the key areas of investment return because of their popularity, demand, liquidity, and collector base.

PCGS Authorized Dealer

While past performance is no assurance of future growth, there is a new dimension to the security of rare coin investment that did not previously exist. In February of 1986, the Professional Coin Grading Service (PCGS) was born. This service provides improved liquidity, **guaranteed** grading accuracy and authenticity.

All of the coins sold in **PCGS** holders will be purchased sight unseen by **PCGS** dealers who make markets in these coins.

PCGS currently has about 100 authorized dealers, and the network is growing rapidly (there are over 400 dealer/applicants.)

As an **authorized PCGS dealer**, I will be able to serve more customers than ever before. I would like to serve **you**.

I now deal exclusively in **PCGS** coins. I offer investment portfolios from \$500 to over \$250,000.

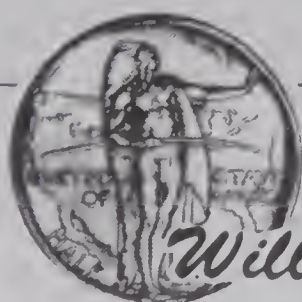

Personal Service

I provide personal service, and I mean **personal**. I handle every account, talk to every customer, provide liquid cash markets, offer advice on both buying and selling, and employ no salesmen.

Besides being an authorized **PCGS** dealer, I am also a member of the American Numismatic Association (ANA), the Pacific Northwest Coin Dealers Association, the U.S. Commemorative Society, and other leading numismatic organizations.

My office hours are 10:00 a.m. to 6:00 p.m., Monday through Friday.

PNG And ANA Next On The Calendar

The Market in Depth

This month ends with the First Annual PNG Convention, to be held February 22-25 at the Registry Hotel in Universal City, California. It's not difficult to find enough good things to say about the Professional Numismatists Guild. Officially founded in 1954, the PNG was very much the creation of Abe Kosoff; through the years many of America's leading dealers served as President. The PNG introduced many important elements of professionalism to the business, including binding arbitration and adherence to a strict code of ethics. Their motto "Knowledge, Integrity, Responsibility" is still the best three-word summary of business ethics to be found anywhere. One can only wonder why the PNG has taken more than a quarter century to hold their own convention. Dealer days (PNG one day shows) at the ANA and Central States conventions have always proven very popular---and this show should be no exception.

Pacific Coast Auction Galleries will be conducting the auction at the PNG Convention. The catalogue contains especially nice selections of early U.S. dollars and gold, balanced by sections for U.S. currency, antiques, and world coins---as befits the wide range of activity of PNG dealers. The Auction will be held February 23-24 at the Registry Hotel.

March begins with the A.N.A. Midwinter Convention to be held in Colorado Springs. The lovely Broadmoor facility makes this show a favorite for attendance, not to mention the spectacular scenery of the Rockies in late winter. Mid American's auction offers plenty of pretty sights, both certified and raw.

Back to the present, plus signs are starting to appear more frequently in the MS-63 columns, especially in Type coins, Dollars, Commemoratives, and Gold. We interpret this new activity as a sign of the general strength of the market, and the specific strength of the collector market. The consistency of plus signs in the upper grades has been the dominant characteristic of this market for the past several months (leading to ever-widening spreads in the Mint State range). Some of that interest and demand has finally begun to "trickle-down".

The movement of activity into the lower uncirculated ranges indicates growing activity in the collector segment. The comment that we are increasingly hearing from astute collectors is that the MS-63 coin represents tremendous value for the money. As one individual pointed out, ten years ago, one "had" to collect MS-65 coins to be considered a "serious" collector; today, with the changed grading standards, in some cases, the same level of quality is available at MS-63 price levels. While only time can tell the financial results of collecting at the MS-63 level, there is no denying that "a lot of coin can be purchased for the money."

This Week's Market

CENTS: The BU Lincoln roll market has taken a back-seat to the singles market. The only issue with a change is the 1970-S sm date roll. It is now up to \$725 Bid. There are several Bidders near this level.

NICKELS: The BU Jefferson series continues to find new buyers for various issues. This week the following rolls are on want lists at higher levels: 1940-S, 1946-P,D, 1947-P, 1948-P, and 1951-S. The 1951-S has now been pushed up to \$50 Bid.

DIMES: BU Roosevelt Dime rolls remain a lackadaisical series. There are another handful of dates which have fallen this week due to lower offers to sell. This series lacks any real leadership. Even common date rolls of Mercuries appear to be soft.

QUARTERS: The BU Washington roll market is suffering from the same malady as the Roosevelt series---lack of positive leadership. There seems to be little confidence in these BU rolls unless, the singles prices for MS-65 and higher, make it practical to cherrypick rolls.

HALVES: BU rolls of Walking Liberty Halves have remained fairly steady of late, that is, until this week. There are several minus signs for issues in the 1940's. Support for various dates has slackened, unless of course, the rolls contain some gem specimens. BU Franklin rolls are stable this week except for the 1956 and 1963-P & D rolls; these three issues are lower.

DOLLARS: The Dollar market remains one of the most stable areas of numismatics. From MS-63 thru MS-65, Dollars are on want lists at today's levels. In many cases, dealers are willing to pay in advance of these levels when properly graded coins become available. However, keep in mind, there are the occasional discounted sells when wholesalers do not know who the high buyers are.

PROOF SETS and MINT SETS: Proof and Mint Sets continue their active participation in the market. There are numerous plus signs in both charts which reflect the strength of these markets.

COMMEMORATIVES: Marketmakers are once again making this series very active with many issues in demand at higher Bid levels. Commems are always broadbased, even if buyers are bargain-hunting. But when the market becomes stronger, as it now appears to be, many dealers are willing to pay Bid levels; those having the most success are usually paying ahead of Bids.

TYPE: Silver Type coins are hot! If it is silver, graded properly, and priced according to its grade, it seems to sell quickly. Even though plus signs cannot be found in the copper and nickel columns, these areas are active at current levels, although, the buyers may be a little more selective.

GOLD: MS-63 and better-quality continues to be the strength of the U.S. Gold market. The majority of plus signs are for the infrequently located issues, while the more common issues are steady at today's levels.

EAGLES: American Proof Gold Eagles are wholesaling at: 1986 1 oz-\$443/\$455, 1987 1 oz-\$470/\$490, 1987 1/2 oz-\$230/\$245. Proof Silver Eagles are trading at: 1986-\$26.50/\$28.50, 1987-\$17.25/\$18, 1988-\$42/\$45. BU 1986 Silver Eagles trade at \$11.20/\$11.50.

A weekly comparison of ratios of certified coin bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer newsletter*. For specific certified bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-qualification grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Thanks A Million.

*The PCGS One Millionth Coin
1894-S Morgan Silver Dollar / MS-66*

PCGS was established to create a new standard for the rare coin industry in February of 1986. Our business principles were inspired by a genuine desire to preserve the integrity of the rare coin industry for collectors, investors and dealers, alike. Our objective was to revolutionize the rare coin industry . . . forever.

The certification of our one millionth coin on December 21, 1988, surpassed our greatest expectations, and symbolized a major milestone toward the achievement of that goal.

Today, thanks to your overwhelming acceptance and support, PCGS celebrates its third anniversary as the most successful grading service in the numismatic marketplace.

Precision third party grading, the PCGS guarantee of grade and authenticity, easy liquidity through the Ameri-

can Numismatic Exchange's electronic trading market, and consumer protection, are the advantages that have made PCGS *the* rare coin grading service of choice. In fact, PCGS clearly represents the lion's share of all certified coins currently traded.

In three short years, PCGS has certified 1,029,302 rare coins with a cumulative declared market value of \$934,678,164 through a network of 367 authorized PCGS dealers nationwide.

As PCGS focuses on the certification of our second million coins, we would like to express our appreciation to those in the numismatic community

who have helped us attain our success. We have worked very hard to earn your loyalty and respect. We are committed to continue to provide our valued clients with uncompromising quality and the highest industry standards for many years to come.

MS-65 PROOF-LIKE (GEM UNCIRCULATED PROOF-LIKE) will exhibit the same characteristics as the MS-65—but with the additional feature of deep mirror proof-like surfaces both sides.

MS-67 & MS-67 PROOF-LIKE (SUPERB) will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices are for typical rolls with mixed grades from MS-60 to MS-63. Any further qualifications, see Singles Page 4.

BU DOLLAR ROLLS

MS-65 DOLLARS REMAIN STRONG Mint State Type Coins Driven Higher

The Market in Depth

Mid-Winter in Colorado may be hot, Hot, HOT---and we're not talking about skiing conditions. This week's American Numismatic Association's Mid-Winter Show at the Broadmoor, in Colorado Springs, promises to be incredibly active. We haven't seen this much market enthusiasm since before the FUN Show!

One of the two hottest spots in this hot market continues to be held by silver dollars---"the plain old, garden variety, every collector should have a few in his collection" cartwheels. Well, maybe not the everyday variety; the plus signs are dominating the charts for MS-65's and 65 Prooflikes (Deep Mirror). Demand for Peace dollars seems to be growing across the uncirculated grades.

The second sizzle in the market belongs to Type coins. MS-64 and MS-65 Mint State specimens continue to demonstrate the axiom that rarity establishes value. PR-65 Proof Type coins are following closely behind. Every indication points to increasing demand for collector coins (including the better dates) and the common issues if graded accurately. As dealers begin to have trouble locating the high grade specimens on their client's want lists, they are beginning to report that the demand is reaching down in the lower uncirculated grades in several series.

High grade U.S. gold continues its advance, especially in the MS-64 grade; collectors are continuing to notice the wonderful quality that can be obtained at a fraction of the MS-65 price. Not that there is any shortage of demand for the MS-65 pieces. The demand for Commemoratives (another favorite series with collectors and investors) continues, with upward pressure especially on the higher grade gold issues.

Pacific Coast Auction Galleries' sale, held last weekend at the First Annual Professional Numismatists Guild Coin Convention in Universal City, provided bidders with more than a million dollars worth of choice collector's coins. The diversified offerings included world coins, ancients, and paper money (nicely representing PNG's varied membership), and prices realized ranged from under \$100 to five-figures, so the auction literally contained something for everyone. Among the highlights:

Denomination	Cataloguer's Grade	Price Realized
1880 Three Cent Nickel	MS-64	\$ 1,155
1878/7 Shield Nickel	PR-64	\$ 1,980
1883 No Cents Liberty Nickel	PR-64	\$ 770
1875-CC Twenty Cents	MS-63	\$ 2,860
1901-O Barber Quarter	MS-63	\$ 1,870
1908-S With Motto \$10 Indian	MS-63	\$25,300
1926 Sesquicentennial \$2 1/2	MS-64	\$ 9,350
(1837-42) Bechtler "250"	VF-20	\$ 2,453

This Week's Market

CENTS: BU Lincoln rolls continue to be left off of want lists. Unless dealers have specific needs for a customer, this series is very lethargic. The only real exception is the 1970-S sm date roll, still strong at today's new Bid of \$735.

NICKELS: The BU Jefferson series continues to find sporadic activity. This week finds the 1946-D roll up to \$20 Bid, the 1949-D roll at a higher \$14, and the 1951-S now up to \$53.

DIMES: BU rolls of Mercury Dimes are relatively steady at current levels, however, some Roosevelt Dimes remain soft. The 1948-S roll fell to \$225 Bid, while the 1955-D is now down to \$35 and the 1956-D is lower at \$53.

QUARTERS: BU Washington Quarters are mixed this week. The early issues (1934 to 1945) are unchanged. The 1946-S is up to \$170 Bid and the 1947-S is higher at \$180. However, the 1951-D (\$120), 1952-D (\$120), and 1955-D (\$88) all fell to lower levels.

HALVES: The Franklin series has been fairly steady for the last several months with most issues in demand at the then current Bid levels. Some issues did move higher, while some of the common issues fell slightly. Nonetheless, this week finds a whole rash of plus signs for dates which are not easily found. Plus signs are almost solid from 1948 to 1953. The Kennedy series remains active at current Bids with several plus signs recorded.

DOLLARS: Common date Dollars in MS-60 and 63 seem to be soft on the market. Several minus signs can be seen in the MS-63 column for these somewhat common issues. Nevertheless, numerous better-date issues are still moving higher as dealers try to fill want lists. The MS-64 column has a balance of plus and minus signs, while the 65 column is littered with mostly plus signs. The Prooflike columns also reflect many active higher Bids.

PROOF SETS and MINT SETS: Proof Sets are stable with a few plus signs monitored for the "S" less sets. Mint Sets remain in strong demand with numerous plus signs from 1962 to 1987.

COMMEMORATIVES: The Commemorative chart is spotted with plus and minus signs, the majority being pluses. Most of the changes occur in the MS-64 and 65 columns where demand has improved this past week. Gold Commems are even stronger in MS-63 and higher.

TYPE: The Type market finds a whole list of plus signs in the MS-64 and 65 columns. This is as many plus signs as we can remember in the Type areas. Proof Type is active, but plus signs are most prevalent in the 65 column.

GOLD: Circulated U.S. Gold seems to have solidified this past week. Many plus signs can be seen with just a couple of minuses. A few MS-60 issues are still soft, though MS-63 and higher grades are strengthening.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$444/\$460, 1987-\$480/\$500; 1987 1/2 oz-\$225/\$240. Proof Silver Eagles trade at: 1986-\$26.50/\$28.50, 1987-\$17/\$18, 1988-\$45/\$47.50. BU 1986 Silver Eagles are higher at \$11.25/\$11.65.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

ANA AND WALL STREET MAKE HEADLINES Dollars, Commems, Type In Strong Demand

The Market in Depth

According to a majority of the dealers who attended the Mid-Winter ANA in Colorado Springs, the show was quite successful. The most successful shows attract a healthy mix of dealers: not enough retail dealers, and you lose the consumer; not enough wholesalers, and all dealers lose the ability to adjust their inventory. The problem shows face are the periods of dead time when dealers are not doing any business; after all, the most dedicated of collectors can only take off so many work days. The resulting feeling of slowness can be offset by the actions of wholesalers.

In attending hundreds of coin shows and listening to many "old-hands" at the show circuit, it seems that the majority of active dealers do most of their business the first day, and the rest of the show is hit or miss. Since that first day is often busy with dealer-to-dealer transactions, it seems that a good time for collectors, who might need or want more personal service, would be well advised to attend the second day (of three day shows). We hesitate to recommend that anyone wait until the final day of any show to attend, because a continuing problem is that many dealers leave early. There is nothing more disconcerting than to drive for an hour and find "no one home". Dealers seeking the opportunity for creating further transactions know this and remain active the entire show.

The overall market continues to perform in a healthy pattern, as most series are trading at current levels (Proof and MS-63 and higher). Those dealers serious about filling client want lists consistently have to pay in advance of current Bid levels. Strength of this market may be further fueled by the incessant talk of the impending Wall Street money 'venturing' into numismatics in a massive display of "dollar power". There are at least two major funds being negotiated at this time.

The ANA Mid-Winter Auction was conducted by Mid-American Rare Coin Auctions. Total prices realized neared \$1.3 million. Silver dollars consigned by the ANA Museum elicited remarkably spirited floor bidding; a half-roll of 1881 Morgans, catalogued as MS-60-63, brought \$6050 when the hammer fell; a full roll of 1902-O Morgans, graded MS-60 to 64, realized \$8525. Some of the more interesting selections included:

Denomination	Cataloguer's Grade	Price Realized
1776 Continental Pewter \$	VF	\$ 3025
1794 "Apple Cheek" Cent	MS-64	\$ 5060
1861 Confederate Cent	PR-63	\$ 2200
1916 Buffalo Nickel	PR-65	\$ 2860
1913-S Barber Quarter	MS-64	\$ 4840
1879-O Morgan Dollar	MS-66	\$ 6600
1839-C Quarter Eagle	MS-62	\$ 4950
1897 Liberty Quarter Eagle	MS-67	\$ 8800
1907 Liberty Half Eagle	MS-67	\$15400

This Week's Market

CENTS: Dealers continue to leave BU Lincoln rolls off of their want lists. There are very few buyers of BU rolls, and usually, the only dealers who show any interest at all, are ones with retail stores catering to the collector.

NICKELS: BU Buffalo Nickel rolls are steady at current levels, as are most Jefferson issues. A few dates have advanced due to higher Bidding. The 1946-D is now Bid at \$23, while the 1976-P & D rolls moved up to \$7 each. The 1977-D is also higher at \$6.50 per roll. The 1945-D fell to \$165 Bid.

DIMES: BU Mercury Dime rolls continue to find some soft spots as a few issues decline this week. The 1941 and 1942 rolls fell to \$550 Bid per roll and the 1944 roll dropped to \$500. Several more BU Roosevelt issues fell this week as this series remains very weak. Eventually, someone is going to feel that this series presents a well-timed buying opportunity.

QUARTERS: BU Washington Quarter rolls are not as weak as the Roosevelt series, but then again, buyers are few and far between for both series. There are several minuses as some dealers try to unload before further declines occur.

HALVES: The Franklin series may be an indication that all is not negative. There are several plus signs for issues from 1948 to 1951. And even more positive is the fact that later issues remain unchanged.

DOLLARS: The BU Dollar market remains as active as could be expected. Plus signs are scattered throughout the MS-63 to MS-65 columns, with a sprinkling of increases in the Prooflike columns also. Just to show that this is a healthy two-way market, there are some minuses also, mostly in MS-63's.

PROOF SETS and MINT SETS: These two areas of the market remain very active at current levels with several dates moving upward this week. The only negative was found for the 1964 Proof Set, now Bid at a lower \$13.50.

COMMEMORATIVES: Silver Commems remain very strong with numerous plus signs found in the MS-64 and 65 columns. Gold Commems are higher in MS-63 and better grades. The low mintage issues make this series very difficult for the collector to complete, especially an evenly matched set.

TYPE: Type coins may have been the most sought after area of the market (with the exception of Dollars) at the Mid-Winter ANA. Every dealers' want list had at least a few Type coins on it. Mint State specimens remain stronger than Proof issues.

GOLD: Just prior to the ANA, U.S. Gold (VF thru AU) seemed to be firming. At the ANA, prices became even stronger. A multitude of plus signs can be found as marketmakers feel this area may have reached bottom.

EAGLES: American Proof Gold Eagles trade at: 1986 1 oz-\$446/\$465, 1987 1 oz-\$470/\$495, 1987 1/2 oz-\$215/\$235. Proof Silver Eagles are trading at: 1986-\$26.50/\$28, 1987-\$17/\$18, 1988-\$50/\$53. The BU 1986 Silver Eagle is trading at \$11.15/\$11.70. The 1988 Proof Silver Eagle is very quietly becoming a "rare coin". Since last November, when Silver was almost 10% higher, Bid has increased from \$27 to \$50.

SERVICE	LOW	HIGH	AVERAGE
PCGS	83.4%	112.1%	97.8%
NGC	93.1%	108.3%	99.6%

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Summary, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCN. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. For more details on Indicator and a complete listing of series and issues refer to July 1988 Monthly Summary.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions
are used throughout the CDN to designate the exact quality of Brilliant Uncir-
culated coinsMS-60 - Unc. may not have full mint luster, may be dull, toned, or spotted. May
be the worst possible example, but shows no wear or damage.MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not
be so dark as to hide any problems), will have minor bagmarks and may show
weakness of strike. Above average coins.MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65.
Few contact marks in field, only minor marks on main devices. Full strike, with
eye-appeal. Attractive toning permissible.MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main
devices. Attractive toning permissible. A very tiny percentage of available BU
coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

WALL STREET HAS ARRIVED 64 And 65 Columns Abound With Plus Signs

The Market in Depth

For many weeks now, the numismatic marketplace has been deluged with rumors concerning an impending Wall Street "fund". The rumors have now been verified as a number of dealers have already sold coins into this fund, to be managed by the new partnership of Hugh Sconyers and Kevin Lipton. We believe the following information to be as accurate as possible at this time.

It has been talked about for what seems like a "numismatic eternity"; in reality, probably at least 25 years---as chronicled within these pages. It has been bantered about at coin shows, auctions, club meetings, even one-on-one discussions. Well, the talking stage is history. Wall Street has arrived in a BIG way---to the tune of at least \$25,000,000. To the best of our knowledge, up to this point, some Wall Street firms have only dabbled in U.S. coins. However, this is the first major commitment by a top Wall Street firm---to initiate a private offering of at least \$25,000,000 up to as much as \$50,000,000 for U.S. coins. Kidder, Peabody of New York, has cemented the foundation for years to come. Furthermore, it is anticipated that other firms will soon follow. If our sources are correct, other funds are already in the planning stages. In fact, at least one more fund has already been signed.

What is the motive behind this breakthrough? It will come as no surprise to many dealers who have heard the rumors over the last couple of months that a new partnership has been formed by Hugh Sconyers and Kevin Lipton. The sole purpose of this organization is to manage funds from a private placement by Kidder, Peabody. The operation began doing business in Beverly Hills around the first of March, and will manage the fund for a period of up to seven years.

Hugh and Kevin will be buying slabbed or raw coins---anything which they feel is underpriced and can show profitability over a period of seven years or less. They will also buy slabbed coins which they feel are undergraded for the purpose of resubmitting them for a higher grade. Eventually, all the coins purchased for the fund will be slabbed by one of the leading grading services. This is not unlike what any solid coin firm would do for their client base, with one giant exception---\$25,000,000 to \$50,000,000 deep pockets!

The new organization will buy coins at auctions, coin shows, and even large private offerings if they fit into the parameters which the new partnership has designated. Their main objective will be to return the highest possible profit to their limited partners, but the main result will be to bring coin investing to Wall Street and add new investors to the numismatic industry. The success of this fund will show the world that investing in U.S. rare coins can be profitable and ethical. And to bear this out even further, the partnership only profits from truly realized gains from sales (not paper profits); furthermore, they will only receive a small management

fee until profits are actually received by the fund itself.

Who is really behind this breakthrough? Hugh Sconyers has been involved in numismatics for many years. He was instrumental in bringing the Redfield Dollar purchase to fruition and has been the financial backbone to numerous other multi-million dollar numismatic transactions. He is definitely not your typical coin show dealer; he is a behind-the-scenes marketing specialist who has again stepped into the limelight.

While Kevin Lipton attends every major coin show and auction in the country, he is also not your typical wholesale dealer. Recognized at an early age as a "boy wonder", he quickly became well-known throughout the industry as one with ambition; and with little hesitation, he went straight to the top. Much of his business is made up of selling deals rather than single transactions. Now, with the expertise of Hugh and Kevin together, they have put together a history-making plan; and Wall Street will sell it. Hugh and Kevin are not just marketmakers; they are truly makers of markets.

This Week's Market

CENTS thru HALVES: Activity for the BU roll market is sporadic at best. Aside from a few minor changes, the majority of action took place on half dollars. Several BU Franklin rolls moved higher, as did numerous Kennedy rolls. The half dollar series, both Franklin and Kennedy, seems to be receiving all of the attention of dealers, while other series of BU rolls are being ignored. **DOLLARS:** Over the past few months there has been a shift in activity in the Dollar market. Prior to this change, 90% of the Bidding activity took place in the MS-64 and 65 columns with only a small percentage occurring for MS-63's. The climate has changed somewhat, as the 63 column has recently been receiving its fair share of market activity. Most dealers have begun to realize that the 63's may be a good buy in relation to 64's and 65's, especially at the current Bid differentials.

PROOF SETS and MINT SETS: There appears to be no let-up in sight for Proof and Mint Sets. Most are stable at current levels, with several continuing to increase almost on a weekly basis.

COMMEMORATIVES: The Commemorative series is an indication of how strong the entire market is becoming. The MS-64 and 65 columns are covered with plus signs as dealers try to stock up on high grade material. Many of the plus signs are for better issues, but when those cannot be located, the more common issues will have to do.

TYPE: Mint State Type coins are on the majority of dealer want lists. It does not matter if the coins are 63's, 64's, or 65's, if they are properly graded and priced near current levels, they will sell. Proof issues are almost as strong, however, most dealers here are looking for higher quality coins.

GOLD: The U.S. Gold market appears to be strengthening as all grade levels are active with many issues sporting plus signs. Most marketmakers once again feel this series is coming off of recent lows and will move upward.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CON to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU. Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU. Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU. Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

COMMEMORATIVES

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

One of the greatest auction sales of our time will take place at the Vista Hotel, World Trade Center, New York City, Monday, March 27th through Friday, March 31st, and we invite you to participate in it. You can bid in person, or, as many of our clients do, by mail. This catalogue gives you complete information. On the block will be selections from "Four Landmark Collections," including the Hagle Collection, formed many years ago and kept in a bank vault since then; the Jerome Griner Collection (of Hard Times Tokens), the Lionel L. Rudduck Collection (of Civil War tokens and store cards), and the Aubrey and Adeline Bebee Collection, as well as other notable properties.

The Hagle Collection, to be sold on March 27th and 28th, is laden with fantastic rarities, including two 1882 (yes, 1882) Liberty Head nickels, exact type of 1883; superb early silver coins, Liberty Seated rarities; a prooflike 1796 half dollar and one of the finest known 1797 half dollars, the legendary 1838-O half dollar; silver dollars, including THREE different specimens of the 1794 (!), a gem Proof 1802 restrike, dozens of early 1795-1803 dollars, including Uncirculated coins (!), 1836 Gobrecht with name in field; gold rarities from \$1 to \$50, including nearly 100 \$3 pieces (including two 1854-D, 1873, 1876, etc.); dozens of rare half eagles 1795-1834, including one of two known 1825/4 pieces, and multiple other rarities from the 1820s and early 1830s; \$10 1795-1804, including great rarities, later \$10 including Uncirculated 1838, the rare 1875, 1907 With Periods, rolled rim, multiple 1907 With Periods, wire rim, etc.; \$20 including Proofs, and one of the most remarkable offerings of MCMVII High Relief pieces ever to be sold; commemoratives, including a gem Panama-Pacific set; territorial gold, including 1850 Baldwin "horseman" \$10, 1855 Wass, Molitor \$50, and much more! By itself, this offering would stand as one of the greatest ever!

The Jerome Griner Collection and the Lionel L. Rudduck Collection will be sold on the afternoon of March 29th, "Americana Day" we have called it. In addition to many superb tokens and store cards, there will be a rich offering of colonial coins from 1652 Massachusetts coins onward, plus state copper coins, Washington pieces, etc.

Part II of the Aubrey and Adeline Bebee Collection (we sold the first part in 1987) and other items will be sold on March 30th and 31st, in conjunction with the New York Metropolitan Convention at the same site. Included will be important gold coins, silver dollars, commemoratives, an 1895 Proof set, and other coins; U.S. paper money, including Gem New "Educational" notes and other popular items, a superb "Technicolor" note, Proofs and essays of fractional currency, Lester Merkin's believed unique lavender background fractional currency shield (earlier owned by the Chapman brothers), uncut sheets, etc.; coins of the world, including long runs of German state issues, high-grade Canadian coins, gold coins, and much more!

THE \$200,000 WORLD SERIES OF HARNESS HANDICAPPING FINAL

is going on at Northfield Park, Cleveland Ohio as you read this CDN insert.

What in blazes does a horserace handicapping contest have to do with rare coin investments? (Let me think on that awhile.)

O.K. I GOT IT !!

Numbers, Calculations, Opinions, Decades of Experience, Mathematics, Logistics, Pedigree, Percentages, Inside information, and the keyKnowing just a bit more than your closet competitor.

When Sgt. Joe Friday asked for "just the facts", he may have been referring to harness racing prognostication.... or maybe rare coin investing.

The thousands of entrants of WSHH have been slowly whittled down since October '88 to a small select group of players, possibly the best in the world.

Just Lucky ?? I make my own LUCK HAPPEN.

I am now ready to combine my 28 years of rare coin experience and percentages and create BIG WINNERS in the Rare Coin Market over the next 5 years.

I was shocked to slip on the realization that virtually all of the above angles I use to sort a random chain of events (8 or 9 horses starting even at a designated position and coming to the final finish one mile later) parallel the rare coin investments I personally choose for my clients.

"A WILD ANALOGY", " RIDICULOUS!"

These may be the thoughts of my audience, but while I'm in Cleveland this weekend parlaying a mythical \$1,000 bankroll into a real \$140,000 check ,think about this idea.....

Wouldn't it be great to add all these angles to the rare coins in your portfolio?

Wouldn't it border on the sublime to double, triple, or even quadruple your money?

Impossible ? NO!

But you must WANT to be successful to SHOW BIG PROFITS!

According to my figures only 1%-3% of all coins offered will show DRAMATIC GAINS.

Yes,yes, some will appreciate 2%,5%, 10%..... but you can get that at the S & L.

Everything!

If your inventory is worth at least \$75,000 and you would like to find out more about the way it would work if you were to ask us to consider buying your inventory we invite you to contact Mr. Greg Rohan, Vice-President. Mr. Rohan will personally take charge of your needs. He will explain in advance how a sale of this type will occur. He will estimate the time needed and make all arrangements with regard to payment, shipping, etc.

You don't have to get ready for us. We are used to coin shops being cluttered and disorganized. We will "come as you are." All transactions will be held in strictest confidence.

HOT MARKET GETTING HOTTER 64 And Better Coins Strengthen As Inflation Rises

The Market in Depth

"This market is HOT! And it looks like coins will never be cheaper!"

Well, we can't pass judgement on the accuracy of that dealer's predictions, any more than we will allow ourselves to make such predictions about the market. Coins may or may not be cheaper in the future; more important is the current reality of this feeling of strength in the marketplace. And that strength is both cause and effect to the attitudes of dealers and their clients. These positive feelings, at the risk of mixing metaphors, are the heart of the Bull Market.

It certainly doesn't hurt that prospects for rising inflation seem to be preoccupying the nation's press, in what may well become a classic case of self-fulfilling prophecy: 'if everyone else is worried about inflation, maybe I better be too! So I better raise the price on my products before my suppliers do it to me, OR, I better buy my hard assets or freeze-dried food or rare coins or whatever before the prices go up.' Whatever the rationale, the past teaches us that such uncertainties have proven beneficial to coin prices. With the new exposure to the Wall Street community and their mega-dollars, there is no telling where it might all end. Especially now with the stock market showing some weakness and increased volatility.

In our March 10 issue, we mentioned that the 1988 Proof Silver Eagles were "very quietly becoming a 'rare coin'" at \$50. Well, the 1988 is quiet no more! Since last November, when silver was 10% higher, Proof Eagles have seen some interesting action: 1986 Bids have increased from \$25.50 to \$26.50; 1987 Bids have dropped from \$18 to \$17; and 1988? A whopping increase from \$27 to \$62. How many "rare" coins have more than doubled in five months?

There wasn't much volatility at Stack's \$2.8 million Howard W. Gunlocke Collection, just rising prices. Even stalwart coin collectors were appreciative when the \$1,000 "Grand Watermelon" note reached \$121,000. Gold coins and Walking Liberty Halves were especially strong. Among the more interesting pieces were:

Denomination	Cataloguer's Grade	Price realized
1917-S Obv. 50¢	Choice BU	\$15,950
1919-S 50¢	Gem BU	\$10,450
1921-S 50¢	BU	\$12,375
1881 \$2.50	Gem Pr.	\$22,000
1886 \$3	Gem Pr.	\$39,600
1879 \$4, Flowing Hair	Pr.	\$40,700
1799 \$10	Choice BU	\$17,050
1902 \$10	Choice Pr.	\$44,000
1904 \$20	Gem BU	\$11,500
1907 \$20 Liberty	Pr.	\$46,200
1907 \$20, Roman Num.	Unc.	\$18,700

This Week's Market

CENTS: There appears to be an increase in Bidding activity for BU Lincoln rolls. Although Bids are sporadic and limited as to quantities needed, interest is being shown for the first time in many weeks. Many of the Bids being monitored are near current levels.

NICKELS: Original Buffalo rolls are steady at current levels. Occasional rolls which come on the market will usually sell rather quickly within today's levels. The majority of Jefferson Nickel rolls are unwanted by most dealers, yet, a few are active at current Bids. The only changes this week are for the 1945-D, down to \$155 Bid, and the 1946-D, now up to \$25 Bid.

DIMES: BU Mercury Dime rolls are receiving very little dealer attention; as a result, Bids are unchanged. BU Roosevelt Dime rolls remain soft as Bidding is sparse. However, very few issues are lower this week due to discounted sells.

QUARTERS: Very few early-date Washington Quarter rolls are offered on the teletypes anymore. Availability usually occurs at shows or auctions and quantities are always limited. This causes dealers to neglect the attempt of even Bidding on these infrequently encountered rolls. Later issues, the 1950-S, 54-S, and 58-D, are lower this week.

HALVES: Bid levels for a few Walking Liberty Half rolls are showing some weakness. Most dealers feel that any rolls which may become available have already been cherrypicked. However, for totally original rolls, which have high quality coins within, any number of dealers would be glad to buy them for the sum total of the singles. BU Franklin and Kennedy rolls remain strong.

DOLLARS: Each week finds the MS-63 column more and more active. It has moved ahead of the MS-64 column in the number of Bid changes each week. I guess this can be best explained with the phrase "MS-63's have a long way to go." But doesn't this describe MS-64's in relation to MS-65's also?

PROOF SETS and MINT SETS: While Proof Sets are steady at current levels, the Mint Sets are showing a lot of strength at higher levels. The 1966 thru 1987 sets are showing the most activity.

COMMEMORATIVES: The Commem market (Silver issues) is going through some adjustments in lower grades. The more common issues are seeing Bids falter somewhat. However, Bids for MS-64 & 65 issues remain quite strong.

TYPE: The Type market remains strong at current levels. Most dealers are taking a respite this week from advanced Bidding.

GOLD: The U.S. Gold series continues to firm at higher levels. The only grade not showing plus signs is MS-60. All other grades have several issues rising.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$451/\$464, 1987 1 oz-\$475/\$495, 1/2 oz-\$220/\$240, 1988 1 oz-\$615/\$645, 1/2 oz-\$300/\$330. Proof Silver Eagles trade at: 1986-\$26.50/\$28.25, 1987-\$17/\$18, 1988-\$62/\$70. Bu 1986 Silver Eagles wholesale at \$11.20/\$11.75.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjective grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor blemishes and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

The Market in Depth

If you buy and sell coins and make profits in the process, you would consider that to be successful. However, losing money can also be considered successful if you gain valuable information in the process (to ease the pain of the loss, it may help to call this "asset transference"---money exchanged for knowledge).

Such knowledge can be more valuable than its cost if applied to future ventures. E.g., one might learn that it is better to take shorter profits in an up-cycle than to try to maximize profits and get caught chasing dwindling dollars in a downward cycle. Curiously, human nature assigns greater value to the lessons learned at greater cost. Consultants understand this perfectly: if they give information away, it will be ignored; charge \$10,000, it will demand attention; charge \$20,000 and it will demand action.

The Coin Dealer Newsletter tries to bring our subscribers marketplace lessons whenever possible. With the rapidly changing marketplace, it seems that some dealer, somewhere, is "learning something new" nearly every week. And they are quite often anxious to share it with us so that we can share it with you. Never mind that many of the discoveries are "re-discoveries"---numismatists share the predilection for repeating past mistakes just like everyone else.

The recent excitement over investor dollars calls to mind some observations shared by a dealer who continues to actively serve collectors. He pointed out that while the concept of sight-unseen trading seems basically alien to collectors (whose chief pleasure is to examine the coin), he thought all was not lost. To the diehard collector, similarly graded coins will never be the same, since beauty remains in the eye of the purchaser. As long as there are collectors, they will remain immune to computerized trading, and sight-seen rarities will outsell sight-unseen. And even for the really common "generic" coins, collectors will still make a difference. Thousands upon thousands of 1881-S dollars may trade in the \$350 range, but there will always be a collector willing to pay a little more to pick out his favorite.

Collectors certainly seemed to have liked what they saw at Bowers and Merena's Four Landmark Collection Sale which began on March 27th. Proceeds from the first session alone reached \$3 million. Highlights from that session included:

Denomination	Cataloguer's Grade	Price Realized
1894-S Barber Dime	Good-4	\$ 33,000
1797 50¢, O-101a	MS-60 or finer	\$ 66,550
1836 50¢ Reeded edge	PCGS Pr-63	\$ 48,400
1825/4 Half Eagle	EF-45 to AU-50, PL	\$148,500
1827 Half Eagle	NGC-63	\$ 38,500
1922 Grant w/star 50¢	MS-65	\$ 39,600

This Week's Market

CENTS: Bidding activity remains about the same this week for BU Lincoln rolls, yet, dealers remain reluctant to raise their Bids. Dealers may be getting enough material at these current Bids, to justify not raising their Bids.

NICKELS: The BU Buffalo and Jefferson Nickel market also remains unchanged as dealers are not willing to raise their Bids. However, it is probably "good news" that discounted sells are not being monitored either.

DIMES: BU rolls of Roosevelt Dimes continue to retreat to lower levels. They may not lose ground every week, but the overall trend appears to be downward. From 1946 to 1951, the majority of issues are lower.

QUARTERS: The BU Washington series is faring just a little better as the number of minuses is fewer than for the Roosevelt series. Yet, the trend here is also lower as several dates have fallen.

HALVES: As strong as the Franklin series is, a couple of minus signs still appear this week. Nonetheless, this series is quite active at today's levels as a number of dealers support the majority of dates in this series.

DOLLARS: The MS-63 Dollar column remains quite active with the majority of changes to the upside. The MS-64 and 65 columns are extremely active as marketmakers try to locate quantities of properly graded coins. Most dealers are willing to pay above Bid levels if they find coins they like.

PROOF SETS and MINT SETS: No 'S' Proof Sets are higher while other sets are active at current levels. Mint Sets from 1962 to 1987, are almost all higher as several dealers keep this area strong.

COMMEMORATIVES: The Silver Commem market has a good balance of strength for MS-64 and 65 coins and a slight weakness for lower grade material. Gold Commems are active in all grades with added strength in MS-63 and higher.

TYPE: The Type market continues to be a favorite among dealers. They feel that this area is about to explode. This is even more apparent when one sees the results of major auctions.

GOLD: With gold bullion moving down slightly this past week, the confidence of marketmakers has weakened slightly, but only for VF thru AU grades. MS-63 and higher grades remain on want lists at today's levels.

EAGLES: American Proof Gold Eagles are wholesaling at: 1986 1 oz - \$448/\$460, 1987 1 oz - \$470/\$495, 1/2 oz - \$215/\$235, 1988 1 oz - \$615/\$645, 1/2 oz - \$300/\$325. Proof Silver Eagles trade at: 1986 - \$26.50/\$28.50, 1987 - \$17/\$18, 1988 - \$63/\$69. BU 1986 Silver Eagles trade at \$11.25/\$11.75.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (es 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Summary, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCDN. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. - may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

*The PCGS One Millionth Coin
1894-S Morgan Silver Dollar / MS-66*

PCGS was established to create a new standard for the rare coin industry in February of 1986. Our business principles were inspired by a genuine desire to preserve the integrity of the rare coin industry for collectors, investors and dealers, alike. Our objective was to revolutionize the rare coin industry . . . forever.

The certification of our one millionth coin on December 21, 1988, surpassed our greatest expectations, and symbolized a major milestone toward the achievement of that goal.

Today, thanks to your overwhelming acceptance and support, PCGS celebrates its third anniversary as the most successful grading service in the numismatic marketplace.

Precision third party grading, the PCGS guarantee of grade and authenticity, easy liquidity through the Ameri-

can Numismatic Exchange's electronic trading market, and consumer protection, are the advantages that have made PCGS *the* rare coin grading service of choice. In fact, PCGS clearly represents the lion's share of all certified coins currently traded.

In three short years, PCGS has certified 1,029,302 rare coins with a cumulative declared market value of \$934,678,164 through a network of 367 authorized PCGS dealers nationwide.

As PCGS focuses on the certification of our second million coins, we would like to express our appreciation to those in the numismatic community

who have helped us attain our success. We have worked very hard to earn your loyalty and respect. We are committed to continue to provide our valued clients with uncompromising quality and the highest industry standards for many years to come.

ACTIVE BIDDING FORCES MARKET HIGHER BU Silver Rolls Only Area Not Participating At Higher Levels

The Market in Depth

Over the last few months a new trend seems to have taken place in the coin business. It appears that marketmakers have become more serious about buying coins. This leads us to the conclusion that there is an increase in the number of new clients entering the coin market. What leads us to this important piece of knowledge? The fact that dealers have expanded their buying interests is of major importance. Not only are dealers attempting to purchase the usual high grade coins (65's and better quality that are so difficult to locate that the usual result is higher prices with few if any transactions), they are also trying to buy 64 and 63 coins; knowledgeable numismatists attempt to purchase the highest grade coins which are available, not just MS-65 and above.

Dealers and their clients are being enticed by the large spreads between two grades. For example, a 1901-P Morgan Dollar in MS-65 is Bid \$37,000, while an MS-64 is Bid \$14,000. Not only are you unlikely to locate one in MS-65, but the possibility of locating an MS-64 is almost as remote. Furthermore, an MS-63 is not found in very many inventories. Until recently, most marketmakers concentrated their Bidding activities on 65 and better. Presently, dealers are expanding their Bids to include the highest grades likely to be available. This has caused the MS-63 1901-P to increase to \$6400 Bid. Even this substantial Bid is not likely to create any transactions. The potential seller of such a coin realizes, just as the potential buyer does, that being the highest probable grade available on the market, the price realized on such a coin may be substantially higher than the highest Bid found.

This is just one example of many issues within several series. The topic of many dealer brochures hits on this exact point. There are many areas in numismatics that have substantial growth potential. It is not always the highest graded coins which have the greatest potential (especially if they are not available), it may be the coins which can be located on a limited basis and are usually in demand. The price spreads from one grade to the next should also be considered. It remains of utmost importance for dealers to educate themselves and their clients on the specific coins with the greatest potential.

The 1st National Gold Convention, in St. Louis, this past weekend was a resounding success. The nation's marketmakers were in attendance and the biggest complaint was not "prices being too high," but "there are not enough coins to satisfy want lists". Aside from the Wall Street money which has been entering the market, there seems to be a secondary reaction of fresh money demanding rare coins. Just the fact that Wall Street has enough confidence in the rare coin market that they would invest their clients' money may be enough incentive for many novices to become involved. This sure appears to be the case as the general consensus of "the show" was that it was the best overall in awhile. Even non-marketmakers had a lot to be happy about as their inventories were devastated.

This Week's Market

CENTS: BU Lincoln rolls may be steady at current levels, yet, dealers who offer to buy Lincolns, seem to be satisfied with today's Bids. As such, most Bids remain unchanged.

NICKELS: The BU roll market for Buffalo and Jefferson Nickels appears rather quiet. No Bid changes were monitored for last week. This may be due to so many dealers having gone to the St. Louis show.

DIMES: The onslaught of minus signs for BU rolls of Roosevelt Dimes has slowed this week. The only change is a plus sign for the 1955-S, in the silver related issues. However, there are numerous plus signs in the late-date rolls.

QUARTERS: BU Washington Quarters also found very little activity this past week. Yet, the later clad issues are seeing some advanced Bidding activity (1982 and later).

HALVES: BU rolls of Walkers are unchanged, while the majority of Franklins are the same, as well. However, Franklins remain a very active series at current levels with a few issues moving higher. The 1953-D is up to \$165 Bid, the 1959-D is higher at \$120, and the 1961-D moved up to \$82. The 1963-P & D rolls also advanced, now Bid at \$71 each. Numerous Kennedy rolls moved higher as attention mounts for low-priced rolls. Many of these dates were not saved in large quantities, thus, low availability may force prices even higher.

DOLLARS: Same old "song and dance" for the Dollar market--MS-63 and above are receiving the "lion's share" of attention. Plus signs are plentiful as all dealers, large and small, continue to look for properly graded Dollars for their inventories and/or their clients. Prooflike Dollars keep adjusting higher trying to stay ahead of their Mint State counterparts.

PROOF SETS and MINT SETS: The majority of Proof Sets are unchanged, yet, active at current levels. The "S" less sets continue to move higher. The 1986 and '87 Prestige Sets have fallen slightly. Mint Sets remain strong at today's levels, even though the number of plus signs is down from last week.

COMMEMORATIVES: The Commem market is extremely active in all grades with numerous plus signs scattered throughout the MS-64 and 65 columns (including MS-63's in gold). Due to the low mintages of several issues, it seems highly unlikely that all want lists can be filled. Most likely, some clients will have to make due with the next available grade.

TYPE: The Type market is virtually covered with plus signs in Proof and Mint State 63 and above. Silver coins are the leading active issues, with nickel and copper following close behind.

GOLD: VF to MS-60 U.S. Gold issues are mixed this week as dealers adjust the buy prices to fit their inventories. MS-63 and above coins are advancing as dealers are satisfied if they can locate even one or two coins for their clients.

EAGLES: American Proof Gold Eagles are trading at: 1986 1 oz-\$441/\$454, 1987 1 oz-\$465/\$490, 1/2 oz-\$215/\$230, 1988 1 oz-\$615/\$645, 1/2 oz-\$300/\$325. Proof Silver Eagles trade at: 1986-\$26.50/\$28.50, 1987-\$17.50/\$18.50, 1988-\$62/\$65. BU 1986 Silver Eagles wholesale at \$11.30/\$11.75.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU Brilliant Unc. may exhibit some toning, but it should not be so dark as to hide any problems; will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

A SELECTION OF NUMISMATIC RARITIES FROM THE VAULTS OF MTB BANKING CORPORATION

1866 U.S. TWENTY DOLLAR GOLD PROOF

This aesthetically attractive specimen is one of only 10 or 11 surviving coins from the original mintage of 30 pieces. This highly sought after issue is the first year of the Type II variety with "In God We Trust" added on the reverse. A fabulous specimen of museum quality and rarity. **Borderline Gem Proof 64.** \$45,000.

1881 U.S. TWENTY DOLLAR GOLD PROOF

One of approximately 15-18 known specimens of the original mintage of only 61 coins. This date has always been acknowledged as a true rarity, being the first of the low mintage Philadelphia Mint coinage. The coin offered here is certainly amongst the finest of extant specimens. **Borderline Gem Proof 64.** \$49,500.

1821 U.S. QUARTER EAGLE GOLD PROOF

One of only five known examples of this classic early rarity. Proof specimens of this era are seldom encountered, as is the opportunity to purchase one. This is the first year of issue of Quarter Eagles after a thirteen year hiatus in their production. The Garrett specimen, which was of finer quality (sold as lot 743 in March of 1980), realized \$120,000. **Proof 61.** \$33,500.

1885 U.S. QUARTER EAGLE GOLD PROOF

A magnificent example of one of the lowest mintage of all Liberty Quarter Eagles. Approximately 30 known specimens still survive of the original 87 coins minted. One of the most coveted dates in the Quarter Eagle series. Our present offering is a definite condition census specimen. **Cameo Borderline Superb Proof 64.** \$21,000.

TYPE MARKET — ONWARD & UPWARD Commems Record Steady Advances

The Market in Depth

The Type market is showing an explosion of Bid advances. It is not just the MS-64 and 65 (and Proofs) coins which are climbing, but the 63's as well. To take it further, dealers are not just looking for rare or seldom-seen coins, but the more common issues also. You know, the coins that do show up in dealer inventories. As long as Type coins are properly graded and priced with respect to that particular grade, there are anxious buyers at current Bid levels. An important aspect of this hot area which must be considered when quoting sell prices to clients is that this is a seller's market and buyers usually have to pay a premium. As long as Bid prices climb week after week, as they have recently, it is of utmost importance that clients understand the mechanics of a Bull Market. They must be made aware that these markets can reverse and they must be ready to take quick profits if the market becomes oversold. Nonetheless, the majority of dealers feel we are in the very beginning of a long overdue Bull.

At this point in time, there seems to be so many buyers that the want lists cannot be filled in a short time span. If this demand continues, other areas will have to be explored and eventually most series will be red hot. There are other series now which seem to be attracting buyers as actively as Type: Dollars, Commems, and Gold, yet, these areas are mostly active in 64 and higher. It may be just a matter of time before the 63's begin receiving the widespread attention currently being showered on Type.

For several weeks now, MS-64 and 65 Silver Commemoratives have been registering moderate but consistent gains. The current Bidding is not limited to Commem marketmakers, but individual smaller dealers as well. It is almost certain that more transactions would take place at these higher levels if the coins were available. However, since mintages were low in the outset and even smaller percentages meet the high grade requirements, it appears to some dealers to be a certainty that the MS-63 specimens will soon attract some higher Bidding. This may be the case especially for issues where the price differences between MS-63 and MS-64 are 50% or higher; even more so for issues which are not easily located.

This might be best understood if compared to the Gold Commem market where higher Bidding takes place for MS-63 issues right along with the MS-64's and 65's. Many clients who purchase Gold Commems usually do so on a complete set basis. Some issues are so rare that the number of complete sets available is so low that only a few select clients could have the opportunity of completing an MS-65 set, for example. And as long as the desire for complete sets is robust, then it appears that clients will have to appease their desires by purchasing the highest grade that may be available, which seems to be MS-63 in some cases. Of course, there remains the possibility of upgrading their set when a higher grade comes on the market either through their favorite dealer or at auction.

This Week's Market

CENTS: BU Lincoln rolls seem to be an area where dealers are either trying to buy at Bid, if and when they need them, or, bargain-hunt when they don't have orders. Either way it does not appear that much business is occurring for BU rolls of Lincolns.

NICKELS: BU rolls of Jefferson Nickels saw a little activity this past week. The 1941-P and 41-S rolls moved higher at \$22 and \$84, respectively; the 1946-D fell to \$24 Bid.

DIMES: A number of BU Mercury Dime rolls are lower as the market corrects somewhat (1934-42). BU rolls of Roosevelt Dimes are generally lower from 1956 to 1964. Several clad issues are higher (1972 to 1985).

QUARTERS: BU Washington rolls (silver) are steady at current levels. The clad rolls are experiencing some strength as numerous dates from 1971 to 1986, move higher.

HALVES: The healthiest area of BU rolls appears to be Franklin and Kennedy Halves. There are numerous plus signs in both series, with just a sprinkling of minuses (only three to be exact). Demand for the Franklins which exhibit plus signs is for substantial quantities; while occasional "sells" seem to disappear almost as quickly as they are offered.

DOLLARS: Plus signs may not be as plentiful as last week in the Dollar charts, although there are still enough to validate this hot market. MS-63 and higher grade coins remain in strong demand. Even the majority of those issues with no changes continue to be seen on want lists at current levels. Many dealers are complaining of not being able to locate enough quality coins to satisfy their needs, not only for Dollars but other series, as well.

PROOF SETS and MINT SETS: Proof and Mint Sets remain strong at current Bid levels although the number of plus signs is fewer this week than the last several weeks. Several dealers keep this area rather active.

COMMEMORATIVES: All of the changes this week for Silver Commems took place in the MS-64 and 65 columns. There is a long list of pluses as dealers compete for what seems to be a dwindling supply. In the Gold Commem chart, Bids increased for almost every issue in MS-63 and higher.

TYPE: Advances continue unabated in the Type columns. This is a very lucrative area if you are heavy in inventory. Many issues have still not surpassed their all-time highs so it would seem that due to all the demand that this Bull market may have a long ways to go.

GOLD: VF thru AU U.S. Gold continues to find dealers adjusting their buy prices. This creates a mixed bag of plus and minus signs. However, indicating that numismatics remains strong, MS-63 and 65 coins show numerous pluses.

EAGLES: American Proof Gold Eagles trade at: 1986 1 oz-\$440/\$450, 1987 1 oz-\$465/\$490, 1/2 oz-\$215/\$230, 1988 1 oz-\$620/\$650, 1/2 oz-\$300/\$325. Proof Silver Eagles trade at: 1986 - \$27/\$28, 1987 - \$18/\$18.75, 1988 - \$58/\$60. BU 1986 Silver Eagles trade at \$11.45/\$11.80.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CON to designate the exact quality of Brilliant Uncirculated coins.
 MS-60 - Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.
 MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.
 MS-64 - Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.
 MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

CENTRAL STATES CONVENTION ON DOCKET

Mint State & Proof Type Continues Surge

The Market in Depth

The Central States Coin Convention, in Overland Park, Kansas, should be another on the long list of extremely active events over the past several weeks. It begins on April 20th with PNG Day and ends on the 23rd. Most dealers are anxious to get this show started; they have high hopes of being able to buy coins for their want lists. Some dealers feel that the higher Bid levels are certain to bring out more numismatic rarities so they can be transferred from one owner onto the next. However, we are not certain that this will be the case. As hot as this market appears, it seems like most potential sellers are just waiting in the wings to see how high their inventories climb. Buyers far outnumber sellers in this type of market and it seems like the first two days of any show are the most likely times to locate coins for clients. This usually makes for a very hectic beginning for most major shows, then winds down the remaining days.

Recently we have written about the differences between the 1979-80 Bull Market and today's hot market. We have reiterated the facts that inflation is once again rising, grading is more standard and consistent among dealers, and the market today has a more varied number of marketmakers than in 1979-80. Perhaps this explains why this market is so strong and active despite the fact that bullion and BU rolls (unlike 1980 when these two areas were also extremely active) are lethargic. This is not a bullion-related Bull Market. It is driven by supply and demand; and the demand is far greater than the supply available. If buyers continue to view this market as a long term endeavor, perhaps we shall see a numismatic bull like no other. If this market becomes fueled further by inflation worries and bullion begins to run, then it will pay to be a knowledgeable numismatist.

Type coins continue a major surge as recent highs are surpassed each week. The best news may be that the 63 columns are almost as active as 64's and 65's. This points out that potential buyers are astute enough to realize that they may have to settle for the highest grade available---that is, Mint State or Proof 63. If prices go "out of sight" for the high grade material, we may find that actual trades for these elusive coins will be few and far between. Whereas, the main thrust of actual transactions may occur for 63 graded coins. Keep in mind, as the 63's become more popular, buyers will remain just as selective as they have been for higher grade coins. They will demand an accurately graded coin with no major "hits". It may be slightly weak of strike, or may have a few more marks than a 64; but, it is still an appealing coin. This is something that many numismatists have realized for a very long time, yet, if there was virtually no demand, then dealers could not afford to just keep adding to inventory. This appears to be about to change.

This Week's Market

CENTS: Although changes are somewhat sparse for BU Lincoln rolls, there are a few buyers being monitored on the teletypes at current levels. The 1970-S sm date roll is still proving difficult to locate. Bid is now a higher \$750 per BU roll.

NICKELS: A few BU rolls of Jefferson Nickels have fallen due to discounted offers to sell. The 1938-P roll is now Bid at \$28, the 1942-P tII at \$300, and the 1945-D at \$150. On the positive side is the 1946-P, up to \$15 Bid.

DIMES: BU Mercury Dime rolls are unchanged with but one exception: The 1945-S is down to \$575 Bid. BU Roosevelt Dime rolls are showing varied activity and some of it is higher. The 1953-P is up to \$56 Bid, while the 1956-D and 1960-D are also higher at \$28 and \$23, respectively. However, the 1949-S is down to \$1100 Bid and the 1955-P is lower at \$56 after a quick spurt last week.

QUARTERS: BU Washington Quarters are unchanged in the silver-related issues, with a couple of plus signs in the clad rolls. The 1982-P is up to \$110 Bid.

HALVES: BU Franklin and Kennedy rolls remain at the top of several want lists. If dealers were half as interested in other BU denominations, the roll market would be healthy. As is, only halves capture the interest of Bidders.

DOLLARS: What can be said about Dollars that hasn't been said at least a hundred times before? MS-63 thru MS-65 Dollars (Prooflikes also) have a sizeable number of plus signs as this series corrals a goodly portion of dealer Bidding activity.

PROOF SETS and MINT SETS: The 'S' less Proof Sets continue to move higher while the rest of this series is stable at today's levels. Mint Sets, although stable overall, are showing signs of some slowing for a few issues. A couple of dates have been discounted lately, thus causing their respective Bids to fall.

COMMEMORATIVES: Both Gold and Silver Commemoratives remain as active as one might expect in a Bull Market. MS-63 and higher grade specimens are in strong demand as plus signs are scattered throughout the columns. There are a few minor adjustments for XF/AU and MS-60 coins, yet, these are still active grades.

TYPE: The Type charts continue to be covered with plus signs. It is difficult to remember when Type coins were this hot for this long of time. Week after week, buyers outnumber sellers as they jump Bids in an effort to fill their needs.

GOLD: The U.S. Gold chart looks identical each week. No, Bids aren't identical, plus signs seem to be. The MS-63, 64, and 65 columns consist of plus signs, while the lower grades have a mixture of both pluses and minuses.

EAGLES: American Proof Gold Eagles are trading at: 1986 1 oz-\$440/\$452, 1987 1 oz-\$455/\$490, 1/2 oz-\$215/\$230, 1988 1 oz-\$625/\$650, 1/2 oz-\$300/\$325. Proof Silver Eagles wholesale at: 1986-\$26.50/\$29, 1987-\$18/\$19.50, 1988-\$54/\$58. BU 1986 Silver Eagles trade at \$11.65/\$12.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-80 - Unc. may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

COMPARE FOR YOURSELF

Order One of Ours
And One of Theirs.
See If You Can Tell The Difference.

Compare the coins above. Same type of coin. Same numerical grade. Same protective slab. Different grading services. And what a difference in the price! Sure, PCGS and NGC apply stricter grading standards, and that may be fine for some dealers and investors. But is it really worth paying more than twice the price on the coins you want for your collection?

You Can Save 50% or More on Most NCI Graded Coins!

According to the *Certified Coin Dealer Newsletter* ("Bluesheet") which tracks prices for coins graded by the leading grading services, the wholesale prices of NCI graded coins regularly average LESS THAN HALF that of the coins graded by PCGS or NGC. But the actual quality of the coins is nearly the same. You might not even be able to tell the difference! So, you can save 50% or more on most of the NCI graded coins you buy!

NCI Is Your Assurance Of Value On Every Coin.

If you're looking for value, compare NCI, and surprise your eyes. You'll be delighted to discover how much further your coin-buying dollar can go...and how much more quickly your collection will grow!

announcing a proposal
for a new standard in service
for America's coin dealers

&

The *Coin Dealer Newsletter* has been commissioned to survey dealers' attitudes towards the creation of a new computerized numismatic network for telecommunications, pricing, and trading - a network to be managed by an independent, "third party": the *Coin Dealer Newsletter* senior staff and a professional team to be selected with one purpose - to serve **you**.

Why another network?

There has been increasing demand among dealers for a new, enhanced teletype network. A network that would feature:

- ★ Widespread ownership among coin dealers.
- ★ Enhanced messaging for directs and open communications.
- ★ The most complete listing of sight-unseen Bids and Asks for **all qualified certification services** in **NUMEX**, the Numismatic Exchange.
- ★ Management by the *Coin Dealer Newsletter* senior staff, directing professionals dedicated to your needs.
- ★ 24-hour system (active at all times), utilizing the latest in computer technology for ease of use.
- ★ Local Area Network supportable for multiple computers at your location.
- ★ Simple but strict rules embodying the standards of the numismatic community; binding arbitration for disputes.
- ★ Promotion of numismatics, the **NNN**, **NUMEX**, and its marketmakers.

We have prepared a pamphlet outlining the services to be provided by **NNN** and **NUMEX**. Please send the coupon below for an information kit.

BUSINESS BOOMING AT CENTRAL STATES Dealers Paying Premiums For Strictly Graded Coins

The Market in Depth

The Central States Numismatic Convention may have provided a sneak preview of what the future holds for the coin show circuit. Held in Overland Park, Kansas, but a stone's throw from Kansas City, Missouri, CSNS was an extremely phenomenal show. Every dealer questioned felt that this market cannot get any hotter due to the lack of supply of fresh coins. The dealer-to-dealer trading activity was hot and heavy throughout the first two days of the show. Several dealers mentioned how they sold as much as 80% of their inventories (the first day) before they realized that they couldn't replace it unless they were willing to pay more. Bargain-hunters (if there were any) were left at the starting gate as they still look for someone who doesn't realize the strength of this market.

The majority of dealers feel this market is stronger than 1979-80, with a more widespread cross-section of areas (series & grades) in demand. Purchasing power is not spurred by bullion and speculation; fresh money and knowledgeable buyers are the mainstay not the exception. The massive number of buyers is a vast improvement over the small number of market leaders which supported the 1979-80 market.

Despite the frenzy of trading taking place, many dealers are still trying to keep a "cool head" about themselves, just in case a pivotal correction takes place. In fact, many of these same dealers are hoping for advanced bidding to slow somewhat so the market can steady itself at current levels. However, the higher bidders are simply afraid of not being able to buy enough coins for their clients at current Bid levels, so they have to leap-frog past each other. In many cases, the potential sellers are still demanding 20% to 30% over the new higher Bids which are 5% to 10% higher than the previous week's Bids.

The rapid advancement of Bid levels is what may change the appearance of some coin shows in the future. As we previously stated, CSNS was extremely successful from the dealers' point of view. Sales were very lucrative to other dealers, yet, the public is most likely lost at a show of this nature. The public is just not ready to pay dealers they don't know, 30% to 40% over our listed Bid levels for coins that they are skeptical over. The public may not be quite ready for this type of market. However, dealers are buying coins for their more astute clients. These clients have studied the coin market and they are willing to rely on their professional dealer. The result being that the public may not be buying a lot of coins at coin shows from dealers that they don't know, but, they will be able to verify that the professional dealer that is handling their numismatic account is giving them a fair shake for accurately graded coins.

The Central States Auction was conducted by Kurt R. Krueger. Among the rarities found in this sale were:

Denomination	Cataloguer's Grade	Price Realized
1943-S Lincoln Cent-Bronze	XF-40/40 ANACS	\$25,025
1916 Standing Liberty Quarter	AU-50	\$ 4,400
1880 Trade Dollar	PR-60+	\$12,650
1895 Morgan Dollar	PR-63	\$15,125
1854 \$1 Gold TII	MS-60	\$ 5,060
1889 \$1 Gold TIII	MS-65	\$ 7,975
1878 \$3 Gold	MS-60+	\$ 8,250
1795 \$5 Gold Wide Date	AU-50	\$12,100
1898 \$20 Gold	PR-60+	\$14,020
1851 Humbert Fifty Dollar	XF-40	\$ 7,700

This Week's Market

CENTS thru HALVES: The BU roll market remains steady overall with the most activity occurring in the half dollar series. Franklins continue to move higher (1948-1953), while Kennedy rolls also find numerous plus signs for clad issues. Most of the increases for Kennedy rolls are nominal advances.

DOLLARS: Although some minus signs can be found in the MS-63 and higher Dollar charts, this, by no means, is an indication of weakness. These are just slight adjustments to correspond with the high dealer Bids. On the other hand, the majority of plus signs in the charts represent sizable increases, especially in the MS-65 column. Market strength is so widespread that most market-makers don't even realize how high they will pay until they see the coin. At Central States there were some coins which sold several times, with price ranges from \$40,000 to \$60,000, and higher.

PROOF SETS and MINT SETS: The market is undergoing some corrections as dealers examine inventories and needs. The 'S' less Proof Sets continue to climb higher.

COMMEMORATIVES: This market is so hot that almost every issue is higher in MS-65. And the 64's are receiving much carryover action since 65's may not be available.

TYPE: The Type market is experiencing an amazing run of activity and plus signs are just a small indication of this overall strength. As with the Dollar market, Type also finds dealers paying well in excess of their Bids once they view the coin and find it is to their liking.

GOLD: The U.S. Gold chart continues to show strength in the MS-63 to 65 columns. Almost every issue is higher as dealers climb over each other's Bids. Still, very little is available, even at these higher levels, in MS-65 quality.

EAGLES: American Proof Gold Eagles are wholesaling at: 1986 1 oz - \$437/\$449, 1987 1 oz - \$450/\$490, 1/2 oz - \$210/\$230, 1988 1 oz - \$625/\$660, 1/2 oz - \$295/\$320. Proof Silver Eagles trade at: 1986 - \$26.50/\$28.50, 1987 - \$18/\$19, 1988 - \$54/\$56. BU 1986 Silver Eagles trade at \$11.70/\$12.25.

THE GREYSHEET

Numbers are used as shorthand for edjective grading. The following descriptions are used throughout the CON to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Thanks A Million.

*The PCGS One Millionth Coin
1894-S Morgan Silver Dollar / MS-66*

PCGS was established to create a new standard for the rare coin industry in February of 1986. Our business principles were inspired by a genuine desire to preserve the integrity of the rare coin industry for collectors, investors and dealers, alike. Our objective was to revolutionize the rare coin industry . . . forever.

The certification of our one millionth coin on December 21, 1988, surpassed our greatest expectations, and symbolized a major milestone toward the achievement of that goal.

Today, thanks to your overwhelming acceptance and support, PCGS celebrates its third anniversary as the most successful grading service in the numismatic marketplace.

Precision third party grading, the PCGS guarantee of grade and authenticity, easy liquidity through the Ameri-

can Numismatic Exchange's electronic trading market, and consumer protection, are the advantages that have made PCGS *the* rare coin grading service of choice. In fact, PCGS clearly represents the lion's share of all certified coins currently traded.

In three short years, PCGS has certified 1,029,302 rare coins with a cumulative declared market value of \$934,678,164 through a network of 367 authorized PCGS dealers nationwide.

As PCGS focuses on the certification of our second million coins, we would like to express our appreciation to those in the numismatic community

who have helped us attain our success. We have worked very hard to earn your loyalty and respect. We are committed to continue to provide our valued clients with uncompromising quality and the highest industry standards for many years to come.

Selected Quality NCI Gold and Silver Dollars are the hottest coins on the market as I pen this ad.

I see prices on nice coins doubling within 2 years and if you remember an insert I ran several months ago, I offered a \$5 gold coin Free if the coin did not double after 2 years.

Well, we sold plenty of coins from that insert.

We no longer offer the 2 year guarantee, but we will send you a \$5 gold piece Gem BU (No, it's not a \$5 Indian worth \$8,000, Mr. Frickell from San Bernadino) with every order over \$1,000 !

All orders shipped Postpaid via registered mail fully insured to your front door.

We guarantee you will be pleased.

30 day Money-Back Return Grace with each and every coin purchased.

We're Life Members of so many darn numismatic organizations I've lost track.

PREMIUM BIDS CREATE TRANSACTIONS Bid Levels Continue To Skyrocket For Commems & Type

The Market in Depth

It seems like the only way that dealers have a chance of fulfilling their Bids is to increase the current high Bid by a fair amount and then be willing to pay the 20% to 30% over Bid which is usually what the potential seller is demanding. And if one buyer is too slow in his decision-making process, another one comes along and snaps up the coin for his client. We have pondered this situation over the last several weeks, as we compared this current market to the 1979-80 market. It may appear that we are "beating a dead horse", yet, we are concerned (and fear) that the clients, or, public in general, do not get left "holding the bag", so to speak.

As we speak with numerous dealers (large and small) across the country, we find that they, too, have the same concerns. They are mostly interested in the long-term ramifications of a market that climbs too high, too fast. But, to a man, they feel that if they don't keep up with this current rapid pace, they will soon be out of business as they sell and deplete their existing inventories, while not replacing coins at new levels. The majority of dealers feel that this market has been fueled by client interest, with fresh money to spend. He is doing just that, as the demand for high grade coins continues unabated. Furthermore, these coins are being taken off the market for the long-term, not just sitting in dealer inventories waiting for higher prices.

The most sought after areas of the market are: Type, Commems, Dollars, and U.S. Gold. Type coins are in demand (Proof and Mint State) for 63 and better quality. In this series, as with others, current holders of desirable numismatic material are not satisfied that there will be a correction of current Bid levels. Meaning, they don't feel prices will go down so that they can replace coins at lower levels. In other words, why sell now when they know full well that replacement costs will be substantially higher. Furthermore, many clients who have the opportunity to take substantial profits at this time, simply query their dealer, "what will I do with the money?"

As for Commems, Dollars, and U.S. Gold the Bidding activity is pretty much the same; 63 and higher quality coins are on most dealer want lists. While many dealers try to buy at current Bid levels, the more successful buyers are those that are in the mainstream of activity and are willing to pay above current levels for properly graded coins. This is one reason why you will find prices far in excess of Bid levels at major shows and auctions --numismatists like to view non-generic coins before they buy them.

An interesting side note to this market is that the generic coins (common Walkers, Dollars, and Merces) seem to be solid at current levels with small percentage increases occasionally found. However, any of the coins referred to on want lists which are not considered generic, have been realizing sizeable advances which make other investments pale by comparison.

This Week's Market

CENTS: The BU Lincoln roll market remains somewhat subdued as most Bidding activity takes place at current levels for "want list" material; or, may be of the bargain-hunting variety for inventory type purchases.

NICKELS: The Jefferson series is generally stable at today's levels. The only changes occur for 1946-P & 47-P, both higher at \$20 and \$13.50, respectively.

DIMES: BU Rolls of Mercury and Roosevelt Dimes are mostly holding their own at today's levels. The one exception for Mercury Dimes is the 1944-P, now Bid at a lower \$475. In the Roosevelt series, a few issues are being offered at lower levels. The 1946-D, 47-D, S, 48-P, and 50-D rolls have declined.

QUARTERS: BU rolls of Washington Quarters are steady at current levels although a few issues have fallen slightly. The 1943-D and 45-D are both down as new Bids are \$550 and \$260, respectively. Also down is the 1948-P roll at \$155.

HALVES: BU Franklin rolls continue to be more active than the lower denominations. This week's Bidding takes place at current levels with one exception: The 1953-D roll is now up to \$185 Bid. Kennedy rolls also remain active at today's Bid levels.

DOLLARS: The Dollar charts find plus signs liberally scattered throughout the MS-63, 64, and 65 columns. And not to be outdone, the Prooflike columns also join in the explosion. The majority of increases are not just nominal either, as dealers continue to leapfrog each other. This causes some Bids to increase as much or more than 10% in just one week's time.

PROOF SETS and MINT SETS: Proof sets remain steady at current Bids, while Mint Sets are mixed. A few of the silver sets, 1960-67, are lower, however, the later sets (1971-84) continue to increase.

COMMEMORATIVES: It is difficult to imagine a series hotter than Commemoratives. Everyone wants Commems these days. Whether it's the beauty and variety of the series, or, the low mintages, this series is in constant demand.

TYPE: You can't talk about hot areas of the market without mentioning Type. Plus signs abound in the Type charts as there seems to be panic in the air. Dealers need material for their customers who don't want to be left out of this fast-moving market.

GOLD: As usual, MS-63 and higher U.S. Gold continues to climb. Keep in mind that buyers for these issues are demanding strictly graded coins. Almost will not be accepted. It certainly helps if they are graded by either PCGS or NGC.

EAGLES: American Proof Gold Eagles are wholesaling at: 1986 1 oz - \$426/\$438, 1987 1 oz - \$440/\$480, 1/2 oz - \$205/\$225, 1988 1 oz - \$630/\$670, 1/2 oz - \$295/\$320. Proof Silver Eagles are trading at: 1986 - \$26.50/\$28, 1987 - \$18.50/\$19.50, 1988 - \$51/\$57. BU 1986 Silver Eagles trade at \$11.65/\$12.25.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 Choice BU - Brilliant Unc. may exhibit some toning, but it should not be so dark as to hide any problems, will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Announcing . . . THE AUSTRALIAN KOALA FIRST PROOF ISSUE

The reverse design of the First Proof Issue of the Australian Koala. The issue will be limited to 12,000 12 oz coins. The obverse features an effigy of Her Majesty Queen Elizabeth II.

- **FIRST YEAR OF ISSUE** 1988 marks the first in a new series of Australian Platinum Proof Koalas. First year issues often appreciate at a faster rate. Reference the 1987 Chinese 100 Yuan Platinum Panda coin. Issued at \$1,195, this coin now sells for \$1,725, an increase of 44%.
 - **SELL OUT EXPECTED** Only 12,000 proofs will be struck for worldwide distribution. This includes Australia itself. Of this total only 3,000 proofs have been allocated for the U.S. market. Collector and Investor demand may well dwarf the supply.
 - **LEGAL TENDER PROOF COIN** Each frosted piece will be double struck in 99.95 fine platinum by the Perth Mint, Australia's oldest operating mint, under the Australia Currency Act.
 - **THE RAREST PRECIOUS METAL** Platinum is the most limited precious metals. It is 15 times rarer than gold and is rapidly becoming the metal of choice among collectors and investors.
 - **SERIALLY NUMBERED** Each proof coin will be delivered in a special Jarrah wood case. Jarrah is a highly sought after hardwood unique to Australia. A serially numbered silver medallion is built into the case. The lowest numbers will go to early subscribers.
 - **OFFICIAL ISSUE PRICE** Order at the Official issue price of \$595, while supplies last. To ensure immediate confirmation of your order call today.
- Worldwide Mintage 12,000 • Unique Design • First Year of Issue • U.S. Allocation 3,000

STREAKING MARKET PUSHES SAINTS HIGHER

Plus Signs Cover Gold, Dollar, Commem, & Type Charts

The Market in Depth

There is something about seeing the biggest---the best---the RECORD! Well, this week witnesses what may be the greatest number of plus signs ever to fill a Greysheet. And even more impressive, the increases behind the plus signs are larger than any we can remember. For more than a quarter of a century, the CDN has seen markets come and go; plus and minus signs by the tens of thousands; market jumps up and down and every other movement you can imagine. And this week will stand out for some time---although, if this market continues its upward spiral, we may have to say the same thing about next week too! And most gratifying has been the growing number of plus signs in the MS-63 charts---the market strength is carrying along the 'lesser' uncs.

Collectors were out in force for Stack's back-to-back Herman Halpern and the accompanying U.S. Gold, Silver & Copper Coins auctions. The 330 lots of the Halpern Collection of U.S. Gold Coins, assembled over four decades, realized more than \$1.6 million. Highlights included a pair of 1796 \$2.50; the No Stars, graded EF, brought \$33,000; an AU specimen of the Stars variety realized \$35,200. Halpern's 1795 \$10 in Choice BU, realized \$88,000.

Stack's U.S. Gold, Silver & Copper Coins sale, including several specialized collections, realized an additional \$3 million. Among the gold highlights were an 1833 \$1 gold, Brilliant Proof, @ \$21,450; a 1900 \$5, graded Choice Brilliant Proof @ \$45,100. Among the other series, a 1918/17-D nickel, Choice BU, was hammered down at \$35,200. High grade specimens, both date and type, brought equally spirited action in a market driven by quality. A 1901-S Quarter, in Choice BU, brought \$28,600. The collection of New Jersey coppers was headlined by the 1796 Maris 24-I specimen, in Choice VF, that realized \$20,350.

Dealers have been keeping a steady eye on price increases on St. Gaudens Double Eagles. Upward pressure on prices for all uncirculated specimens has been increasing for several weeks; and the increases have been by date and mintmark, not just type. The greatest increases have been registered in the MS-65 and MS-63 charts, but even the 'lowly' MS-60's have been jumping. Over the past month, the 1907 No Motto in MS-65 has increased from \$4250 to \$5100; the 1916-S from \$3500 to \$3900. The 1922 MS-63 has jumped from \$800 to \$950, while the price of gold decreased from \$384.50 to \$376. Remember, twenty years ago Double Eagles were hardly considered rare coins; it seems that the discovery is being made all over again. Perhaps someone really is reading those population reports. See this week's Monthly Summary for the latest updates in your favorite series.

This Week's Market

CENTS: Aside from one major buyer who is looking for choice original rolls (most dates in the 30's and 40's), the majority of dealers display little interest in BU rolls of Lincolns. Many rolls are steady at today's levels, yet, it is difficult to visualize any future here due to the advancement of the collector.

NICKELS: The most activity for BU Jefferson rolls seems to be for the highly sought after 1946 roll. It is now Bid at \$24, up from only \$12 in mid-April. The rest of this series is lacklustre.

DIMES: This week finds the Roosevelt series stable after several weeks of minuses. Maybe the "heat" of graded coins will begin to carry over to BU rolls of silver coinage.

QUARTERS: BU rolls of Washington Quarters continue to find occasional discounted sells. This week, the 1940-S (\$685), 1950 (\$155), and 1950-D (\$145) have fallen to lower Bid levels.

HALVES: This is the one area of BU rolls that seems to remain stable week after week. Aside from the usual buyers for Franklin and Kennedy Halves at current levels, there are usually a few other buyers moving in at Bid levels, if not higher.

DOLLARS: Dollars, Dollars, Dollars, everyone wants Dollars. If they grade MS-63 or higher and the potential seller wants Bid to 20% over Bid, he can find a buyer. Once again, every dealer in the country is a marketmaker. They all seem to have buyers for just about every date. An example of how fast-paced this market is, occurs at every show. A rare Dollar appears and sells dealer-to-dealer as many as five times and more. And the last sale may double or triple the original sale.

PROOF SETS and MINT SETS: These two areas of the market are relatively stable at current levels. Changes are minimal this week with a mixture of plus and minus signs.

COMMEMORATIVES: Rather than be repetitive, just read the Dollar section again and replace Commem where Dollar appears. The only difference may be that MS-63 Commems are not advancing nearly as much as MS-63 Dollars. Yet, MS-63 Commems are quite active at today's levels, mainly because dealers (and their customers) cannot locate enough MS-64's and 65's.

TYPE: Talk about hot; if there was a contest to determine which area of the market was the hottest, most dealers feel Type would win, or is it U.S. Gold, or is it Commems, or is it Dollars? Oh well, needless to say Type is at least as strong as these other series. In fact, we made some last minute updates in the CDN Bid levels, which we were not able to make it in the Monthly Summary. Therefore, some of the CDN Bids may be a little higher than Summary Bids.

GOLD: The U.S. Gold market has virtually gone berserk. Bid changes occur across the chart for MS-60 and higher. These prices are for properly graded coins. Too many times in the past, sliders were bringing high prices and when the market slowed, the sliders were worth the lower grade, not the higher.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$424/\$436, 1987 1 oz-\$440/\$480, 1/2 oz-\$205/\$225, 1988 1 oz-\$630/\$660, 1/2 oz-\$295/\$320. Proof Silver Eagles trade at: 1986-\$26.50/\$28.50, 1987-\$19.50/\$21, 1988-\$51/\$56. BU 1986 Silver Eagles trade at \$11.80/\$12.25.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions
are used throughout the CDN to designate the exact quality of Brilliant Uncir-
culated coins.MS-60 - Unc. may not have full mint lustre, may be dull, toned, or spotted. May
be the worst possible example, but shows no wear or damage.MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not
be so dark as to hide any problems), will have minor bagmarks and may show
weakness of strike. Above average coins.MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65.
Few contact marks in field, only minor marks on main devices. Full strike, with
eye-appeal. Attractive toning permissible.MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main
devices. Attractive toning permissible. A very tiny percentage of available BU
coins makes this no-question grade.

listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Selected Quality NCI Gold and Silver Dollars are the hottest coins on the market as I pen this ad.

I see prices on nice coins doubling within 2 years and if you remember an insert I ran several months ago, I offered a \$5 gold coin Free if the coin did not double after 2 years.

Well, we sold plenty of coins from that insert.

We no longer offer the 2 year guarantee, but we will send you a \$5 gold piece Gem BU (No, it's not a \$5 Indian worth \$8,000, Mr. Frickell from San Bernadino) with every order over \$1,000 !

All orders shipped Postpaid via registered mail fully insured to your front door.

We guarantee you will be pleased.

30 day Money-Back Return Grace with each and every coin purchased.

We're Life Members of so many darn numismatic organizations I've lost track.

RAPID — PACED MARKET PROGRESSES

Dealers Find Gem Coins In Short Supply

The Market in Depth

Each and every week, the coin show circuit becomes a little stronger as marketmakers continue to step out and pay in advance of current Bid levels to satisfy a growing need. This past week's Twelfth Invitational Arizona State Coin Convention was still another "gem". Lately, as a show opens to dealers, those with the strongest need practically kick-up dust as they stampeed through the bourse trying to buy coins from other wholesalers.

The biggest movers at this show seemed to be Dollars (MS-63 & higher), Commems (MS-64 & higher), U.S. Gold (MS-60 & higher), Type (all Mint State & Proof), along with Buffs, Mercs, and Walkers (MS-64 & higher). Reports from most dealers indicate that the more coins they sell, the more prices tend to increase; thus, creating even more potential sales. Since there does not seem to be enough coins to satisfy this demand, some dealers feel that as prices move higher, they will need fewer coins to fill a specific order amount.

Bowers & Merena's upcoming Brooks Collection Auction, to be held in New York June 11 and 12, continues the recent trend of spectacular auction offerings. The current market is being driven by quality, and even the 2500+ lot mega-auctions aren't able to satisfy the demand for MORE quality coins. The Brooks sale is especially strong in early dollars (150 Bust pieces) and gold (25 pieces of pre-Lib Half Eagles, 10 pieces of pre-1800 Eagles, mostly AU). Highlights among the Double Eagles include an 1883 Proof 64 to 65; 1899 Proof 64/65; a pair of 1905 Proofs, in 64 and 63; 1907-D Branch Proof 64; and a Gem MCMVII High Relief.

The fast-moving nature of this market reminds us how important it is for everyone to understand the figures in our CDN: Certified Coin Market Indicator box below. Readers who closely follow the percentages will notice that there is a tendency for ANACS and NCI percentage figures to drop as each month progresses. This is not because their Bids have been decreasing---but rather that the PCGS and NGC Bids are rising so rapidly. Since the underlying ANACS and NCI prices are currently updated monthly, while the CDN, PCGS and NGC prices are climbing weekly, the mathematical relationship makes it look like ANACS and NCI are dropping. This is incorrect---in the marketplace, the actual Bids for these coins are rising as well.

This Week's Market

CENTS: For the most part, BU rolls of Lincolns are relatively steady. However, a few dates are lower due to discounted sells. The 1945-D (\$14.50), 1955-S (\$10), and 1975 (75¢) have fallen as a result.

NICKELS: BU Buffalo Nickel rolls remain in demand at today's Bids, with one issue up this week. The 1938-D is now Bid at \$720. In the Jefferson series, the only date with a higher Bid is the 1946, now at \$27.

DIMES: BU Mercury and Roosevelt Dimes are steady at current Bid levels; that is, until 1960 in the Roosevelt series. Most issues from 1960 to 1964 are down to \$22 Bid.

QUARTERS: BU Rolls of Washington Quarters are not seeing a lot of activity, yet, the only issues lower are from 1959 to 1964. Most dealers try to bargain-hunt for earlier rolls, but potential sellers are only occasionally found.

HALVES: BU Franklin rolls are once again attracting some higher Bids. From 1948 to 1951, several issues have risen about \$25 per roll. Numerous Kennedy rolls have moved higher, beginning with 1971 up to 1979.

DOLLARS: The Dollar market continues to see strong advances in MS-63 and higher quality, along with Prooflikes in 63 and 65. There are now at least four coins in MS-65 which are Bid at \$100,000. They are 1884-S, 1889-CC, 1892-S, and 1893-S. To command these high Bids, accurate grading is an absolute must! However, if the right coin becomes available, there are several buyers waiting for a "shot" at such a specimen.

PROOF SETS and MINT SETS: Proof and Mint Set Bid changes continue to be mixed as marketmakers adjust their inventories. Please check page 5 for the various changes.

COMMEMORATIVES: The MS-64 and 65 columns are covered with plus signs for Silver Commems. Dealers report that they cannot keep an inventory of nice Commems as they have buyers waiting to drain that supply when the dealer returns from a successful buying show. Gold Commems are a more dramatic situation as 63's are climbing as fast as the higher grades.

TYPE: This week's Type charts are not nearly as full of plus signs as last week's. Yet, it's close. Even where plus signs are not in evidence, demand remains strong at today's Bids. As the intensity increases for high grade Type, these very same coins are less likely to be available; then buyers are more likely to purchase the next lower grade on the continuum. Most dealers are looking forward to the ever-popular Long Beach Show, in hopes of locating a fresh supply of Type.

GOLD: The U.S. Gold market continues to run stronger for most issues in MS-60 and higher. Many of the advances are substantial as Bidders try to let it be known they are the high buyers. There is one area of downward adjustment as twenties decline slightly.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$422/\$431, 1987 1 oz-\$435/\$465, 1/2 oz-\$203/\$223, 1988 1 oz-\$630/\$670, 1/2 oz-\$305/\$320. Proof Silver Eagles are trading at: 1986-\$26.75/\$28.50, 1987-\$19/\$21, 1988-\$50/\$54. The BU 1986 Silver Eagles are trading at \$11.70/\$12.25.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the transparency sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins
 MS-60 - Unc. may not have full mint lustre, may be dull, toned, or spotted May be the worst possible example, but shows no wear or damage.
 MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.
 MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices Full strike, with eye-appeal. Attractive toning permissible.
 MS-65 - Gem BU - Sharp, full strike No major distractions in field or on main devices. Attractive toning permissible A very tiny percentage of available BU coins makes this no-question grade.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

DEALERS APPROACH LONG BEACH WITH STRONG EXPECTATIONS

Gold And Silver Bullion Softens

The Market in Depth

The cry is being heard throughout coindom---Long Beach is coming! Long Beach is coming! Ninety percent of the dealers are predicting a great show, fueled by this still rising market. The remaining ten percent are starting to wonder if the upward momentum can be maintained. This will not be the first time that Long Beach has played a pivotal role in the market, and it certainly won't be the last time.

We should point out that it is not exactly the Long Beach show that will be pivotal---it would be more correct to say the first day of Long Beach. It seems that increasingly the tenor of a show is determined in the trading activity during the first few hours. In fact, there were some dealers predicting the outcome of the most recent Central States show based on the pace of activity in the hotel rooms before dealer setup. If this volatility "thing" continues apace, dealers may begin predicting show success based on 30-day advance airline bookings!

Back in the real coin market, we have noticed another trend caused by the market's increased volatility. There are groups of coins whose value is increasingly reflected by the Bids for other coins, rather than their own Bids. Prooflike dollars are probably the most noticeable examples. The value of Prooflike specimens (and I remind subscribers that CDN prooflike Bids have always been for properly graded, Deep Mirror Prooflike specimens) is not keeping pace with the rapidly increasing Bids for the underlying non-prooflike issues. This seems to be a function of logistics---dealers are having a hard enough time keeping up with the Morgan market, much less doubling their work by constantly ratcheting their bids on the PL counterparts. In fact, we are seeing numerous cases where PL Bids (especially where they involve the rerunning of older messages on the teletype) are substantially below the 'regular issues'. This does not mean that the PL specimens are less popular than their regular surface counterparts---nor does it mean that they can be purchased for less in the marketplace! The market for Prooflikes is quite strong, thank you, and these premium specimens continue to be much sought after---it's just that the dealers are basing their market purchases on the underlying issues (and sometimes at up to 500% of that Bid), rather than on the actual PL Bids. This would seem to be a corollary of the fact that you cannot purchase coins in the marketplace at Bid; if Bid goes up, the price goes up with it and the premium is maintained (or even increased, lately!).

A similar Bidding trend is taking place among the rarer dates and mintmarks in the predominantly Type series, such as 3-cent nickels and the Liberty Seated series. The Bids on the regular issues are advancing so rapidly, and there is such demand for them (not to mention for the rarer issues) that bidding attention is simply focused on the common issues. If they double, then the price of the rarer coins should ultimately follow.

This Week's Market

CENTS: BU Lincoln rolls remain steady at current levels with very few rolls actually trading this past week. The only change monitored this week was for the 1966 roll, now Bid at a higher \$3.50.

NICKELS: BU Buffalo rolls and early Jeffersons are stable at current Bids (in fact, the 1942 & 47-D Jefferson rolls are higher at \$23 and \$18, respectively). However, various later issues are lower. From 1954 to 1967, several issues have fallen due to discounted sells.

DIMES: The majority of BU Roosevelt Dimes are steady at today's levels; that is, until you get to 1956. From that date to 1964, most of the issues are lower as a result of weak bullion levels.

QUARTERS: The same can be said for BU Washington Quarter rolls. From 1958 to 1964, most dates have fallen this week. However, the rest of this series appears steady.

HALVES: BU rolls of halves (Franklins and Kennedys) appear to be the only area of the silver roll market unaffected by a falling silver market. In fact, the usual buyers are still willing to pay Bid for the rolls they need. The 1953-D is even higher at \$220 Bid.

DOLLARS: The Dollar market is as hot as it has been in a very long time. The MS-63 column is trying to keep pace with MS-64's and MS-65's, with the only weakness appearing for common MS-63's and 64's. Nonetheless, this can be deceptive as there is strong activity at these lower levels. The rest of the MS-63, 64, and 65 market indicates a multitude of plus signs.

PROOF SETS and MINT SETS: These two areas are once again strong at today's levels, even though plus signs are not in evidence. Several dealers have continuing orders for large quantities of numerous dates.

COMMEMORATIVES: The only change in the Commem market is that almost every issue in MS-64 and 65 is higher. Add to that the Gold issues in MS-63 and numerous Silver issues in the same grade and you have one heck of a strong market.

TYPE: As usual, of late, the Type charts (Mint State and Proof) reveal a myriad of plus signs. Dealers are looking to fill want lists, which consist of almost every issue grading 63 and higher.

GOLD: Although lower gold bullion has caused dealers to lower some of their Bid prices for circ U.S. Gold, MS-63 and higher quality continues to dominate many want lists. Nearly every issue is higher this week as potential sellers seem to stay just out-of-reach of the high Bidders.

EAGLES: American Proof Gold Eagles are trading at: 1986 1 oz - \$404/\$416, 1987 1 oz - \$420/\$445, 1/2 oz - \$195/\$220, 1988 1 oz - \$635/\$675, 1/2 oz - \$305/\$320. Proof Silver Eagles are wholesaling at: 1986 - \$26/\$28.50, 1987 - \$19/\$21, 1988 - \$50/\$53. BU 1986 Silver Eagles trade at \$11.50/\$12.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest end highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer newsletter*. For specific certified Bid levels, please refer to *CCDN*. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc. may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Selected Quality NCI Gold and Silver Dollars are the hottest coins on the market as I pen this ad.

I see prices on nice coins doubling within 2 years and if you remember an insert I ran several months ago, I offered a \$5 gold coin Free if the coin did not double after 2 years.

Well, we sold plenty of coins from that insert.

We no longer offer the 2 year guarantee, but we will send you a \$5 gold piece Gem BU (No, it's not a \$5 Indian worth \$8,000, Mr. Frickell from San Bernadino) with every order over \$1,000 !

All orders shipped Postpaid via registered mail fully insured to your front door.

We guarantee you will be pleased.

30 day Money-Back Return Grace with each and every coin purchased.

We're Life Members of so many darn numismatic organizations I've lost track.

Thanks A Million.

*The PCGS One Millionth Coin
1894-S Morgan Silver Dollar / MS-66*

PCGS was established to create a new standard for the rare coin industry in February of 1986. Our business principles were inspired by a genuine desire to preserve the integrity of the rare coin industry for collectors, investors and dealers, alike. Our objective was to revolutionize the rare coin industry . . . forever.

The certification of our one millionth coin on December 21, 1988, surpassed our greatest expectations, and symbolized a major milestone toward the achievement of that goal.

Today, thanks to your overwhelming acceptance and support, PCGS celebrates its third anniversary as the most successful grading service in the numismatic marketplace.

Precision third party grading, the PCGS guarantee of grade and authenticity, easy liquidity through the Ameri-

can Numismatic Exchange's electronic trading market, and consumer protection, are the advantages that have made PCGS *the* rare coin grading service of choice. In fact, PCGS clearly represents the lion's share of all certified coins currently traded.

In three short years, PCGS has certified 1,029,302 rare coins with a cumulative declared market value of \$934,678,164 through a network of 367 authorized PCGS dealers nationwide.

As PCGS focuses on the certification of our second million coins, we would like to express our appreciation to those in the numismatic community

who have helped us attain our success. We have worked very hard to earn your loyalty and respect. We are committed to continue to provide our valued clients with uncompromising quality and the highest industry standards for many years to come.

LONG BEACH "BULLION CURSE": METALS FALL However, Rare Coin Market Remains Strong

The Market in Depth

As of this writing, the Long Beach "bullion curse" is running true to form, although perhaps a few days early. Gold & Silver prices are dropping as usual, but this time around the overall fall is harder. There seems to be little support for the metals; however, this is not affecting the rare coin market. While dealers just prior to Long Beach continued their "complaints" of insufficient quantities of coins in the marketplace, auctions around the country are continuing to offer massive infusions of new material.

The 1989 G.N.A. Sale, presented by Mid-American Rare Coin Auctions, May 26-27, in Atlanta contained 1747 lots, with an abundance of both certified and 'raw' coins. Among the highlights:

Denomination	Cataloguer's Grade	Price Realized
1868 Trime	Proof-65	\$ 3,520
1942 Walking Half	NGC PR-66	\$ 2,420
1870 Seated Dollar	PCGS PR-65	\$35,200
1899 Morgan	PCGS-66, DMPL	\$17,600
1851 \$1 Gold	PCGS-66	\$36,300
1865 \$2 1/2	Proof-64	\$18,700
1915 \$2 1/2	PCGS PR-66	\$63,800

Many dealers heading for Long Beach came early to catch Superior Galleries' 3 auction marathon. The Casterline, Hall & Matthews auction started May 28, with 4000 lots of eagerly awaited fresh material to fill the Long Beach bourse tables and inventory boxes. In addition to a splendid collector's feast of half cents and large cents, the sale contained the quality and quantity that the market is demanding. Superior followed with the Worrell Family Collection, 674 lots of exceptional quality.

Pacific Coast Auction Galleries, host of the Long Beach auction, begins their busy schedule on May 31, with Certsale VII followed by 242 lots of U.S. Gold---regular issues, California fractionals, and territorial. U.S. highlights include a 1796 Draped Bust, Small Eagle Quarter, EF-45; an 1839 No Drapery Half Dollar, MS-62; an 1838 Gobrecht Dollar, Proof-64; and an 1827 Half Eagle, graded MS-63 by NGC. June 11 and 12, in New York, Bowers & Merena's Brooks Collection will add another 2500+ lots to the marketplace.

This Week's Market

CENTS: BU Lincoln rolls are unchanged as very little activity was monitored among dealers due to the short trading week. Of course, this series is usually somewhat quiet anyway.

NICKELS: The Jefferson Nickel series was somewhat more active as a few

rolls changed Bids. On the positive side, the 1942 was higher at \$26, while the 1947-D moved to \$20 Bid. Falling slightly were the 1945-P and 1950-D rolls, now Bid at \$195 each.

DIMES: The Roosevelt series is seeing a number of issues being offered at lower levels. The 1946-P, D, 47-D, 48-P, & D rolls all fell as sellers attempt to unload unwanted material.

QUARTERS: The same can be said for BU rolls of Washington Quarters as sellers offer various dates at lower levels. The following dates are down this week: 1954-S, 55-D, 56-P, D, 57-D, and 58-P.

HALVES: Original rolls of Walking Liberty Halves are unchanged, while Franklin rolls are mixed. Even though Franklins indicate a few minuses (1955, 1959-P & D), this series is strong at current levels. The only increase this week is for the 1953-D, now up to \$240 Bid. Kennedy rolls are active at today's levels.

DOLLARS: The Dollar market continues to blaze. From MS-63 thru MS-65, plus signs are scattered all through the charts. Even though common dates are off slightly in MS-65, activity remains strong from dealer-to-dealer. The minuses here can be considered market corrections as many dealers are competitive at the slightly lower levels. MS-63 and 65 Prooflike ranges move higher again as dealers search out these elusive issues.

PROOF SETS and MINT SETS: Proof Sets are mostly stable at current levels with numerous plus signs in the chart. Most of the 'S' less sets are higher this week. Mint Sets are relatively unchanged as most activity takes place at current Bid levels.

COMMEMORATIVES: Plus signs continue to cover the Commem charts. Most of the higher Bidding activity takes place in the MS-63 thru MS-65 columns of the Gold chart, and in the MS-64 and 65 Silver chart. There are an increasing number of plus signs for MS-63 Silvers.

TYPE: Although the number of plus signs has diminished this week, there seems to be no let-up in actual Bidding activity. Where there are no changes, dealers are simply offering to pay current Bids. However, the number of plus signs is still a strong indication of how most dealers feel the general Type market is underpriced.

GOLD: The U.S. Gold chart is practically a repeat of last week; the MS-63 thru MS-65 issues are almost all higher. The only exceptions are the Twenties, which indicate some Bidding adjustments on the part of marketmakers. Circ gold, in the higher denominations, seems to reflect a sensitivity to softer bullion prices. The lower Bids, by dealers, seem to reflect a lack of confidence in these areas for the short-term.

EAGLES: American Proof Gold Eagles are trading at: 1986 1 oz - \$407/\$419, 1987 1 oz - \$420/\$460, 1987 1/2 oz - \$200/\$220, 1988 1 oz - \$630/\$660, 1988 1/2 oz - \$300/\$320. Proof Silver Eagles trade at: 1986 - \$26/\$27.50, 1987 - \$19/\$21, 1988 - \$51/\$56. BU 1986 Silver Eagles are wholesaling at \$12/\$12.30.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Summary, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCN. Pre-1986 ANACS papers may bring considerably lower bids. Numbers are used as shorthand for adjectival grading. The following descriptions
are used throughout the CDN to designate the exact quality of Brilliant Uncircu-
lated coins.MS-60 - Unc. may not have full mint lustre, may be dull, toned, or spotted. May
be the worst possible example, but shows no wear or damage.MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not
be so dark as to hide any problems), will have minor bagmarks and may show
weakness of strike. Above average coins.MS-64 - Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65.
Few contact marks in field, only minor marks on main devices. Full strike, with
eye-appeal. Attractive toning permissible.MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main
devices. Attractive toning permissible. A very tiny percentage of available BU
coins makes this no-question grade.

graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards
as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the
listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS 65 PROOF LIKE (GEM UNCIRCULATED PROOF LIKE) will exhibit the same characteristics as the MS 65—but with the additional feature of deep mirror prooflike surfaces both sides.

MS 67 & MS 67 PROOF LIKE (SUPERB) will be 100% fully struck—and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices are for typical rolls with mixed grades from MS-60. MS-63. Any further qualifications, see Singles Page 4.

OVERALL COIN MARKET ACTIVE AT LONG BEACH Generic Coins Adjust Downward

The Market in Depth

First reports from the Long Beach Coin Show indicated that the show was beginning fairly tentatively---our quick survey showed a 60:40 split between tentative:positive. By the end of the show, much happier dealers were reporting a 20:80 tentative:positive split. From the pre-show trading through Friday, the show reflected the reality that dealers had largely come to sell coins, not to buy; and to sell at top prices, at that. For the last several months, the market has been conditioned by dealers' need to buy, not to sell; consequently, trading slowed while dealers tried to figure out new pricing strategies for a suddenly different market. Few market-makers wanted to buy in front of the new, uncertain market, and no one wanted to sell below the old, constantly rising market. By the end of the show, equilibrium was again being approached. Prices on some items had dropped, but the market was absorbing the material that was brought to Long Beach to be sold.

Pacific Coast Auction Galleries' Certsale VII was followed by their Long Beach convention auction (which also contained many certified specimens), together realizing more than \$1.8 million. Among the highlights were:

Denomination	Cataloguer's grade	Price realized
1883 3-cent Nickel	PCGS PR-65	\$ 2,035
1938 D/S Buffalo Nickel	NGC-66	\$ 770
1805 Bust Dime	EF-40	\$ 2,420
1874 Liberty Seated Dime	MS-63	\$ 1,650
1796 Draped Bust Quarter	EF-45	\$18,700
1880-O Morgan Dollar	MS-64	\$ 3,740
1928 Hawaiian Commem	PCGS-66	\$33,000
1935 Spanish Trail	MS-63	\$ 2,530
1853 \$1 Gold	NGC-66	\$34,100
1882 \$2-1/2 Quarter Eagle	MS-60 PL	\$ 1,980
1827 \$5 Half Eagle	NGC-63	\$82,500
1908 \$5 Half Eagle	PCGS-65	\$34,100
1909-D \$5 Half Eagle	MS-63	\$ 4,620
1849 Oregon Exchange \$10 Gold	AG-3, defects	\$18,480

So where does this leave the market? Commemoratives are mixed, with common issues lower, and the better pieces steady to higher. Common dollars are lower, with the better issues steady to higher. Type coins, proof and Mint State, are largely steady to higher. Gold is steady, with common issues dipping slightly.

This Week's Market

CENTS: The BU roll market continues to be sluggish. This is well

evidenced in the Lincoln series as very few changes are monitored week after week. The only changes this week are for the 1954-S, 74-S, 84-D, and 86-P; all are higher.

NICKELS: BU Jefferson Nickel rolls may be the one exception to the inactivity of BU rolls in general. Several issues have changed this week, with the majority of these changes being positive. The listed dates are higher: 1942, 47-D, S, 48-D, 49-D, and 54-S.

DIMES: BU rolls of dimes were practically ignored this past week as discounted offers to sell have disappeared. Are dealers becoming reluctant to sell at such low numbers? Or, is it just a waste of time to offer "deals" when there are few if any real buyers? Stay tuned . . .

QUARTERS: BU rolls of Washington Quarters remain basically unchanged. A few of the cheaper issues have fallen slightly as this market finds little support. The 1954-D, 58-P, & D rolls all fell this week.

HALVES: The half dollar market remains the steadiest of the roll market. This week finds few plus signs, however, there are several Bid buyers for many dates within the Franklin and Kennedy series.

DOLLARS: This past week has seen a correction in the Morgan Dollar market, although, this downward movement took place for common dates only. This was bound to occur as Bids had jumped dramatically over the past several weeks. Most dealers feel this is a temporary situation and also can be viewed as a healthy sign in a "Bull" market. Grades MS-63, 64, and 65 were affected by this slight correction. Peace Dollars continued strong in MS-64 and 65.

PROOF SETS and MINT SETS: While Proof Sets do not appear to be as active as past weeks, this may be deceiving. There are a number of buyers at higher Bids with many more dealers trying to buy at current levels. Several Mint Sets are lower due to discounted offers to sell.

COMMEMORATIVES: Like dollars, the Commem market has undergone some downward changes. There are several minus signs present in the charts; however, please notice that it is the more commonly encountered issues which have fallen. Again, dealers feel this will only be a temporary buying opportunity.

TYPE: Among the downward adjustments, the Type market remains active with additional strength found in the rarer issues. There may not be as many plus signs as in recent weeks, but there are enough to make the dealers feel comfortable with this area.

GOLD: The U.S. Gold chart is slightly mixed. The plus signs have dwindled from the last few weeks (MS-63 thru 65) as marketmakers assess their overall positions. The circulated market continues soft in the higher denominations.

EAGLES: American Proof Gold Eagles are trading at: 1986 1 oz - \$407/\$416, 1987 1 oz - \$420/\$456, 1/2 oz - \$200/\$220, 1988 1 oz - \$640/\$660, 1/2 oz - \$300/\$320. Proof Silver Eagles trade at: 1986 - \$26/\$28, 1987 - \$19.25/\$21.25, 1988 - \$52/\$56. BU 1986 Silver Eagles are wholesaling at \$12/\$12.40.

SERVICE	LOW	HIGH	AVERAGE
PCGS	97.4%	125.3%	106.0%
NGC	92.2%	125.3%	104.6%
ANACS	91.1%	115.4%	97.8%
NCI	22.9%	52.7%	36.5%

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer Newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. For more details on Indicator and a complete listing of series and issues refer to July 1988 *Monthly Summary*.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CON to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

LOOK AT THESE ADVANTAGES WITH PHOTO-CERTIFIED COIN INSTITUTE SLABS

- 1. AVAILABILITY** — Anyone can send their coins to the Photo-Certified Coin Institute, Inc. PCI is not a dealer, not affiliated with any coin company, impartial and independent. No longer do you have to go through an "in-crowd" to get consistently graded coins. It's your private business!
- 2. PROFITABILITY** — Our turnaround time is FAST...3 to 30 days compared to up to 170 for other dealers. This means you'll move more coins per month...and that means more profit...especially at our low fees!
- 3. DEPENDABILITY** — Grades you can depend on for sight unseen trading! That's what you get because we have consensus grading. We have 6 different senior graders (each with a minimum of 15 years experience in the rare coin business, plus several belong to the Professional Numismatist Guild (PNG).) We limit the number of coins a grader can see each day to insure against grading burnout. You can be sure today's standard will be the same as tomorrow's standard.
- 4. RELIABILITY** — Counterfeit-proof. We have more hidden detection devices against counterfeiting than anyone in the industry. After a grade is finalized, the case is sonically welded creating a hermetic seal, with an identification tag embedded in the tamper proof plastic slab. The patented case is unique in that it contains not only the coin but a color photograph of the coin. A color negative of every coin is kept in file at PCI for verification in case of loss or theft of your coin.

MARKET REVERSES IN LIGHT TRADING Bids Firming At New Levels

The Market in Depth

The coin market has turned, and it has turned in a big way! The continuous support, which had been readily visible for such a long period of time, has retreated. The jury is still out as to exactly why this has occurred, but, as Occam's razor suggests, the simplest explanation may be the best: A continuous upward market must take an occasional breather to maintain a healthy state. And the opinion of many dealers is that there is still "a load of money out there" waiting to be spent on rare coins.

The when of this downturn is even more interesting, especially if this current situation turns out to be one of over-correction. At Long Beach, the most common issues (within Walkers, Dollars, Gold and Commems) began meeting some strong price resistance. The major marketmakers lowered their Bids and the sellers eventually had to lower their Ask prices in order to consummate sales. Thus, being reminded of the control which the leading marketmakers possess, by pulling or lowering their Bids across the charts they attempted to buy at drastically lower levels.

This served the purpose of lowering the overall appearance of the market; however, the only substantial sales at lower levels occurred with the most common coins mentioned above. The rarer issues may have stalled due to a lack of support at previous higher levels, yet very few actual discounted sales are taking place. When they do occur, it is usually because the seller is trying to strengthen his cash position.

Monthly Summary Update

Since the June Monthly Summary was released, the market has retreated markedly in several areas. To help our subscribers in their buying and selling decisions before the new levels are reflected in the July Summary, we will update you on the areas that declined substantially.

Since we list the Barber coinage and Standing Liberty Quarters by type on page 6 of the weekly CDN, please refer to these charts for any downward adjustments on the type specimens in these areas. Proof Gold and Mint State Walking Liberty Halves, listed only in the Monthly Summary, have shown some dramatic reverses. W.L. Halves appear to have declined about 10% in MS-63 and 15% in MS-65. Proof Gold has taken it on the chin in PR-60 to PR-65, with most issues declining 5% to 20%.

Quality Continues to Inspire Demand

With all the unhappy news of the recent market reversal, we still have some good news to report. A preliminary copy of the dollar section of Rarcoa's session in Auction '89 has crossed our desk, and lovers of quality Morgans will have much to cheer them this summer. Among the dozens of Gem BU specimens are a few that will inspire hearts and wallets to open wide: 1879-CC; 1883-S prooflike cameo; 1884-S prooflike and finest known; 1887-S DMPL cameo; 1889-O DMPL, cameo; 1891-O, DMPL; 1894-P, finest known; and an 1897-O. Despite some recent declines on the

high-grade Morgans, the auctioning of these superlative coins will demonstrate the high esteem in which such quality coins are held in the real marketplace.

This Week's Market

CENTS: Very little movement can be found in the BU roll Lincoln series. Only a few dealers across the country stock BU Lincoln rolls and they seem to be fairly well stocked. Nonetheless, one active Bidder is searching for various issues at just below current levels.

NICKELS: Several BU Jefferson rolls remain on want lists and have moved higher. The 1942 (\$30), 1947-D (\$25), 1948-D (\$17), and 1949-D (\$16) rolls show pluses due to advanced Bidding.

DIMES: BU rolls of Roosevelt Dimes are unchanged as very little in the way of dealer activity was monitored this past week in this series. The only change for the Mercury Dime rolls came from the 1944-S, now down to \$550 Bid.

QUARTERS: BU Washington Quarter rolls were also quiet this past week. None of the silver issues saw any movement, while just a couple of the clad issues moved higher.

HALVES: While Walking Liberty and Franklins Halves lie silent this week, a multitude of plus signs can be found in the Kennedy series. From 1964 to 1986, a whole variety of increases can be found.

DOLLARS: Minus signs can be found throughout the Dollar charts. MS-63 to MS-65 support levels have retreated nearly across the charts. This may not lead to discounted sells of rare date issues, but, inasmuch as visible support has waned, most marketmakers are attempting to buy at lower levels. Moreover, discounted sells have been registered for the more common issues.

PROOF SETS and MINT SETS: This area of the market is mixed as buyers and sellers balance their inventories. Some offers to buy now seem to be at bargain-hunting levels.

COMMEMORATIVES: Generally speaking, the Commem market has been forced to lower levels as top-notch support has vanished, while discounted sells seem to be the rule this past week. Sellers far outnumber buyers and if it continues for much longer, buying opportunities should be present.

TYPE: Like other popular series, the Type market is going through a series of adjustments. However, unlike the other series, the Type charts continue to reflect numerous plus signs also. Even though minus signs are in abundance, it appears that prices are beginning to firm at these new levels.

GOLD: The U.S. Gold chart reveals a long list of minuses in the MS-63, 64, and 65 columns. Dealer support at previous levels has been withdrawn, and new support levels are being tested.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$400/\$407, 1987 1 oz-\$420/\$444, 1/2 oz-\$200/\$213, 1988 1 oz-\$640/\$665, 1/2 oz-\$300/\$320. Proof Silver Eagles trade at: 1986-\$26/\$27.50, 1987-\$19.25/\$21.50, 1988-\$51/\$56. BU 1986 Silver Eagles are trading at \$12/\$12.50.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS 65 PROOF-LIKE (GEM UNCIRCULATED PROOF-LIKE) will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS 67 & MS 67 PROOF-LIKE (SUPERB) will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices are for typical rolls with mixed grades from MS 60-MS 63. Any further qualifications, see Singles Page 4.

SO, WHERE DO WE GO FROM HERE? Collectors Continue Show of Force at Auctions

The Market in Depth

Coin Dealers and investors must feel like the 'Ecstasy and the Agony' as the rare coin market seems to go from the penthouse to the basement. Or, has it? In the new marketplace seemingly dominated by certified coins, are lower Bid prices really an indication of weakness in the market? Or, just a reflection of weakness in cash reserves?

Numismatists usually talk about how coin prices are determined by supply and demand. Perhaps it would be more useful to look at rare coins as a basic cash and inventory industry. When Mr. Cash is plentiful, prices usually increase. When cash reserves begin to dry up, first, inventories stagnate and tend to enlarge as dealers begin to realize they are not selling as much as they were; as cash flow lessens, prices drop.

Over the past few weeks, a cash crunch seems to have hit the industry, thus causing Bids to generally decrease. The majority of the minus signs in the CDN are due to discounted sells. However, in this type of market, with little visible support for even the rarer issues, there seems to be a need for a reassessment even when there are no active sellers.

So, are truly rare coins worth less? This is a question that must be answered in the specific, rather than the general. Certainly the prices of some rare coins have dropped due to sells, while others have dropped due to a lack of bidding support. But Bowers and Merena's June 11 & 12 Brooks Collection Auction yielded \$4.5 million+ against an estimate of \$2 million--and that estimate was prepared while the market was still rising briskly. Even more impressively, most of the lots sold were valued below \$5,000--and it takes a lot of collectors and collector-coins to ring up \$4.5 million at that pace!

Among the highlights were:

Denomination	Cataloguer's Grade	Price Realized
1833 Bust Dime	PR-65	\$ 66,000
1805 Bust Quarter	MS-63	\$ 48,400
1888 \$3	PR-64	\$ 46,200
1915-S Pan-Pac Set	MS-64 to 65	\$132,000

Confirmation of the continued strength of the collector's auction market was provided as the action headed crosstown to Stack's June sale of U.S. Gold, Silver & Copper Coins, held June 13-15, and realizing \$2.3+ million. With coins grading from Good to Proof, the virtually complete collection of Gold coins was dominated by the high-grade circulated specimens.

Highlights included:

Denomination	Cataloguer's Grade	Price Realized
1795 Half-Dollar	EF	\$ 8,250
1836 Reeded Edge Half-Dollar	VF	\$ 1,870

Denomination	Cataloguer's Grade	Price Realized
1794 Dollar	VF	\$28,050
1873-CC Seated Dollar	VF	\$ 8,250

This Week's Market

CENTS: BU Lincoln Cent rolls continue to loll at current levels. There are occasional Bidders, however, they usually want limited quantities of specific dates.

NICKELS: BU Jefferson Nickel rolls are finding a little activity at higher levels. The 1942 roll is now Bid at \$35, the 1948-D at \$18, and the 1949-D at \$17. The remainder of the series seems lethargic, at best.

DIMES: Although BU Roosevelt Dimes are relatively unchanged, this series appears steady at today's levels as dealers are not willing to discount them much further. The only change in the silver issues is for the 1946-D, down to \$57 Bid.

QUARTERS: BU Washington Quarter rolls also appear steady at current levels. The only increases are for clad issues in the 1980's.

HALVES: BU Franklin rolls remain active at current Bid levels. BU Kennedy rolls continue to see higher Bidding activity. Most issues from 1965 thru 1979 are on the rise.

DOLLARS: Adjustments continue to hit the Dollar charts in MS-63, 64, and 65. While most of the minus signs are a result of discounted offers to sell (the majority being common dates), even the better and rare dates are declining as the marketmakers who drove these Bids up, either lower their Bids drastically, or, withdraw their Bids altogether.

PROOF SETS and MINT SETS: Most activity in these two areas takes place at the Bid levels. Very little discounting is occurring at this time.

COMMEMORATIVES: The Commemorative series is getting hit hard by the marketmakers desertion of the market. Even better-date issues are declining due to lower Ask prices. In the silver issues, MS-64 and 65 have been hit the hardest; while the Gold Commems are faltering in MS-63 as well.

TYPE: Up until last week, the Type market was trying to fight off this market correction. But, alas, the strength has dwindled as Type joins the other major series undergoing downward adjustments.

GOLD: The U.S. Gold chart reveals just how weak the entire market is. What a vast difference in the chart of just a few weeks ago when it displayed so many plus signs. The major concern for dealers seems to be, too much inventory, not enough cash.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$402/\$412, 1987 1 oz-\$415/\$440, 1/2 oz-\$195/\$215, 1988 1 oz-\$640/\$670, 1/2 oz-\$300/\$320. Proof Silver Eagles trade at: 1986-\$26/\$28, 1987-\$19.25/\$21.50, 1988-\$50/\$55. BU 1986 Silver Eagles are wholesaling at \$12/\$12.50.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. may exhibit some toning, but it should not be so dark as to hide any problems; will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full step" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

The RARCOA Session of Auction '89

Proudly Presents

Numismatic Rarities of the Decade

The first session of Auction '89, to be conducted by Rare Coin Company of America (RARCOA), features a superb run of U.S. Numismatic Rarities almost unequaled during the past decade. To be held at the Hyatt Regency Hotel in downtown Chicago, Illinois, Auction '89 commences with the RARCOA session on Friday afternoon at 12:30pm, July 7th and concludes with the Stacks' evening session on Saturday, July 8th; Superior Auction Galleries will conduct the Friday evening session and David Akers Inc. the Saturday afternoon session.
